

STAINO & STAINO

Doors & Furnishing's systems

COLLECTION

Sliding doors

The 'Collection Sliding Doors' catalogue is dedicated to our sliding system proposals. The product range is divided into the Easy-S, Extra Light, Master, Segreta and Glass collections. The completeness of the range and the exclusivity of the customizations available are the result of decades of work, design, production and constant commitment to refining our products.

To guarantee the best possible quality, we carry out the entire production cycle within our factory: production, assembly and quality control. For some specific components, we collaborate with other leading companies in the relevant sector, exclusively Italian, controlled and selected with the highest quality standards.

All STAINO&STAINO products are truly Made in Italy.

Collection Easy-S

The **Easy-S** sliding panel system allows the division of internal spaces with doors characterized by a particularly thin perimeter profile, in line with the most rigorous and contemporary architectural projects.

The design of **Easy-S** was developed around two primary needs: the reduced section of the profile, which amplifies the feeling of openness of the spaces and responds to the aesthetic needs of the designers, and the commercial competitiveness, obtained thanks to particularly rapid manufacturing.

The **Easy-S** sliding doors can be coordinated with the pivoting version.

As with the other company collections, the **Easy-S** system can also be customized in terms of profile and glass finishes.

Easy-S 4-panel sliding door | matt black profile PA03 | transparent glass CR01 | crosspieces Three | handles MA17

Easy-S 4-panel sliding door | matt black profile PA03 | transparent glass CR01 | crosspieces Three | handles MA17

Easy-S 4-panel sliding door | matt black profile PA03 | transparent glass CR01 | crosspieces Three | handles MA17

SLIDING EASY-S

*with built-in guides or
guide with valance*

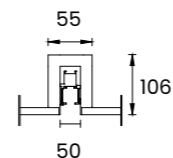

The Easy-S door is **tailor-made to the millimetre**, both in height and width.

The customer can choose from a wide range of finishes for both the profile and the glass. The sliding tracks can be classic or recessed (as in the photo).

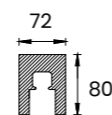

It is possible to communicate with our technicians to evaluate all design opportunities and create the solution that best suits the customer's needs.

Built-in guide
recordable

Guides with
valance

Easy-S sliding door | matt white profile PA02 | smoked transparent glass CR05 | handle MA17

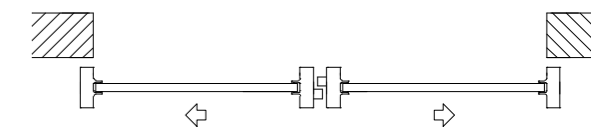

Easy-S 2-panel sliding door | matt white profile PA02 | milky white glass CR03 | handle MA17

LAMINATED GLASS

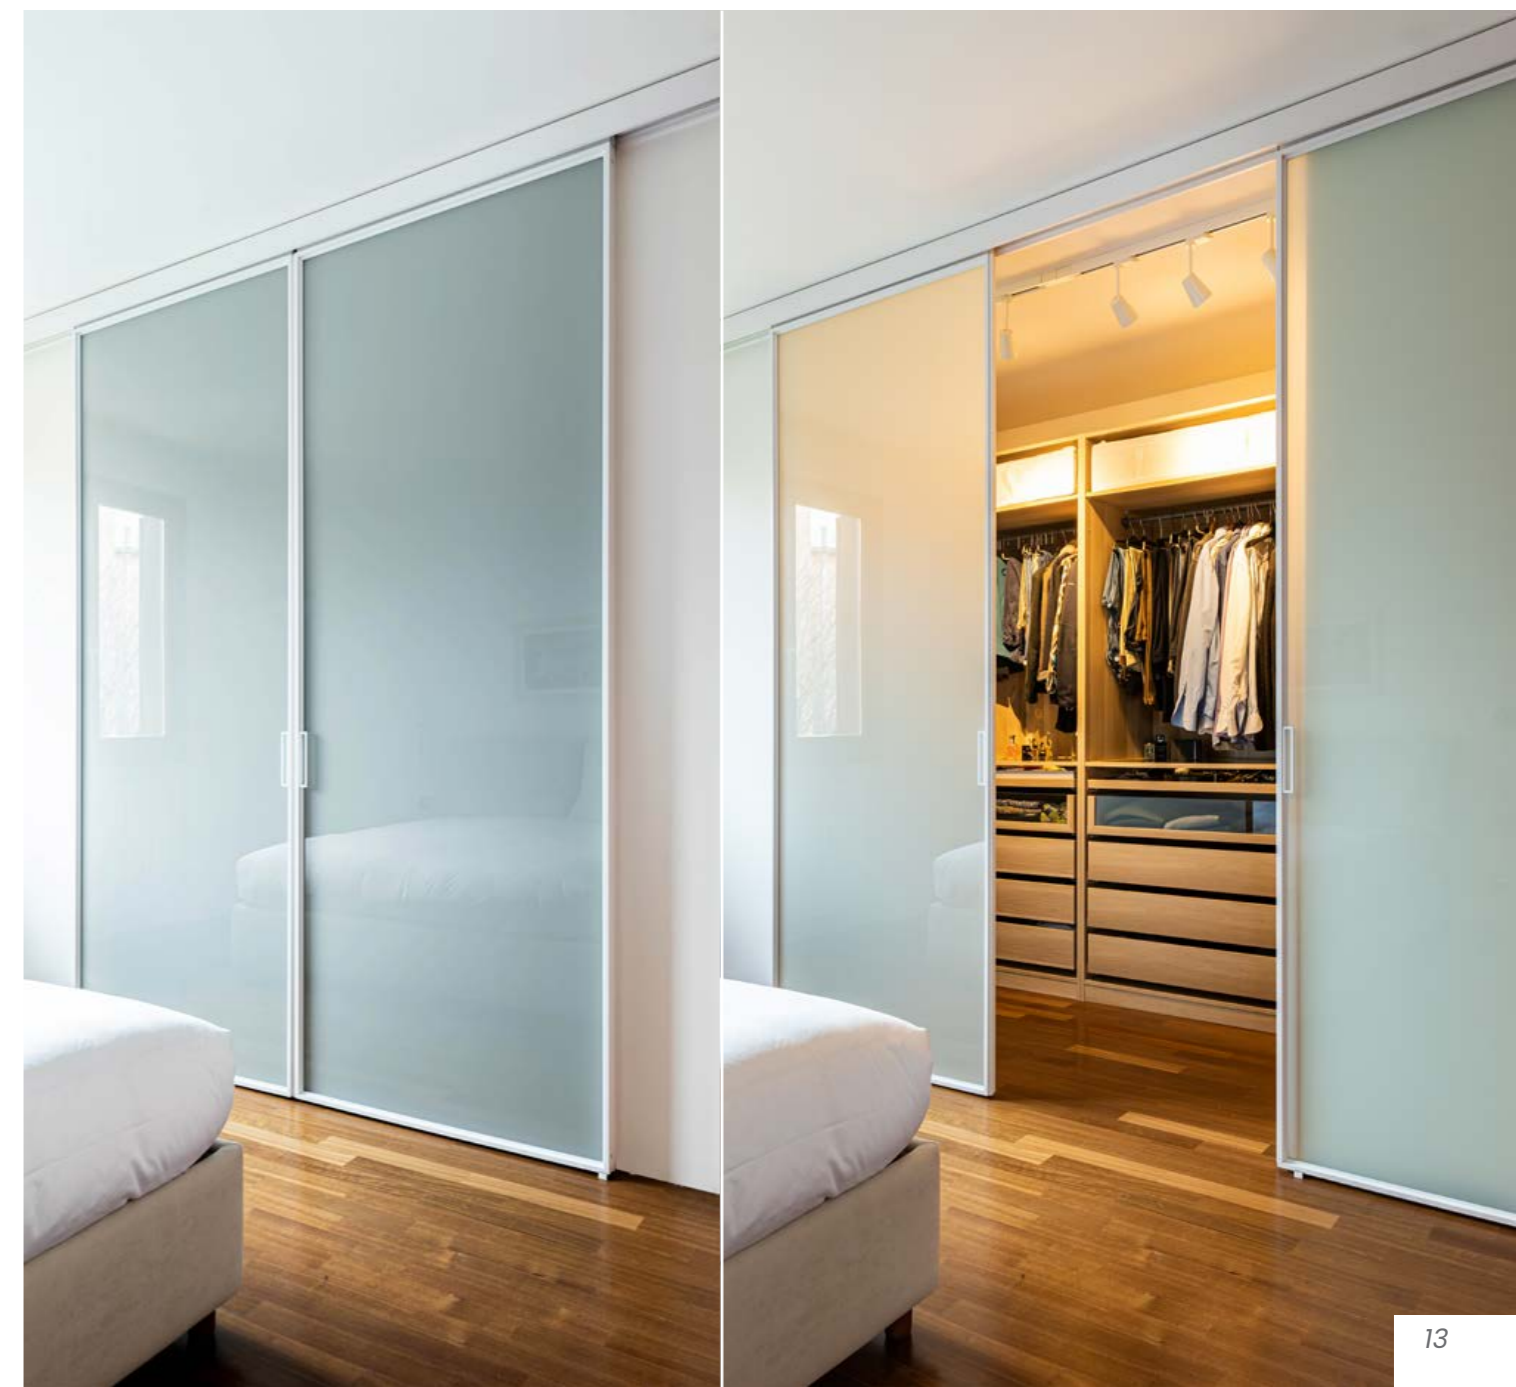

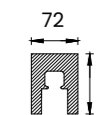

milky white

The **milky white opaline glass** guarantees privacy without preventing the diffusion of light.

Particularly simple to clean, it has both shiny sides, as the opal surface remains inside the two sheets joined by the stratification process which guarantees maximum safety.

Guides with
valance

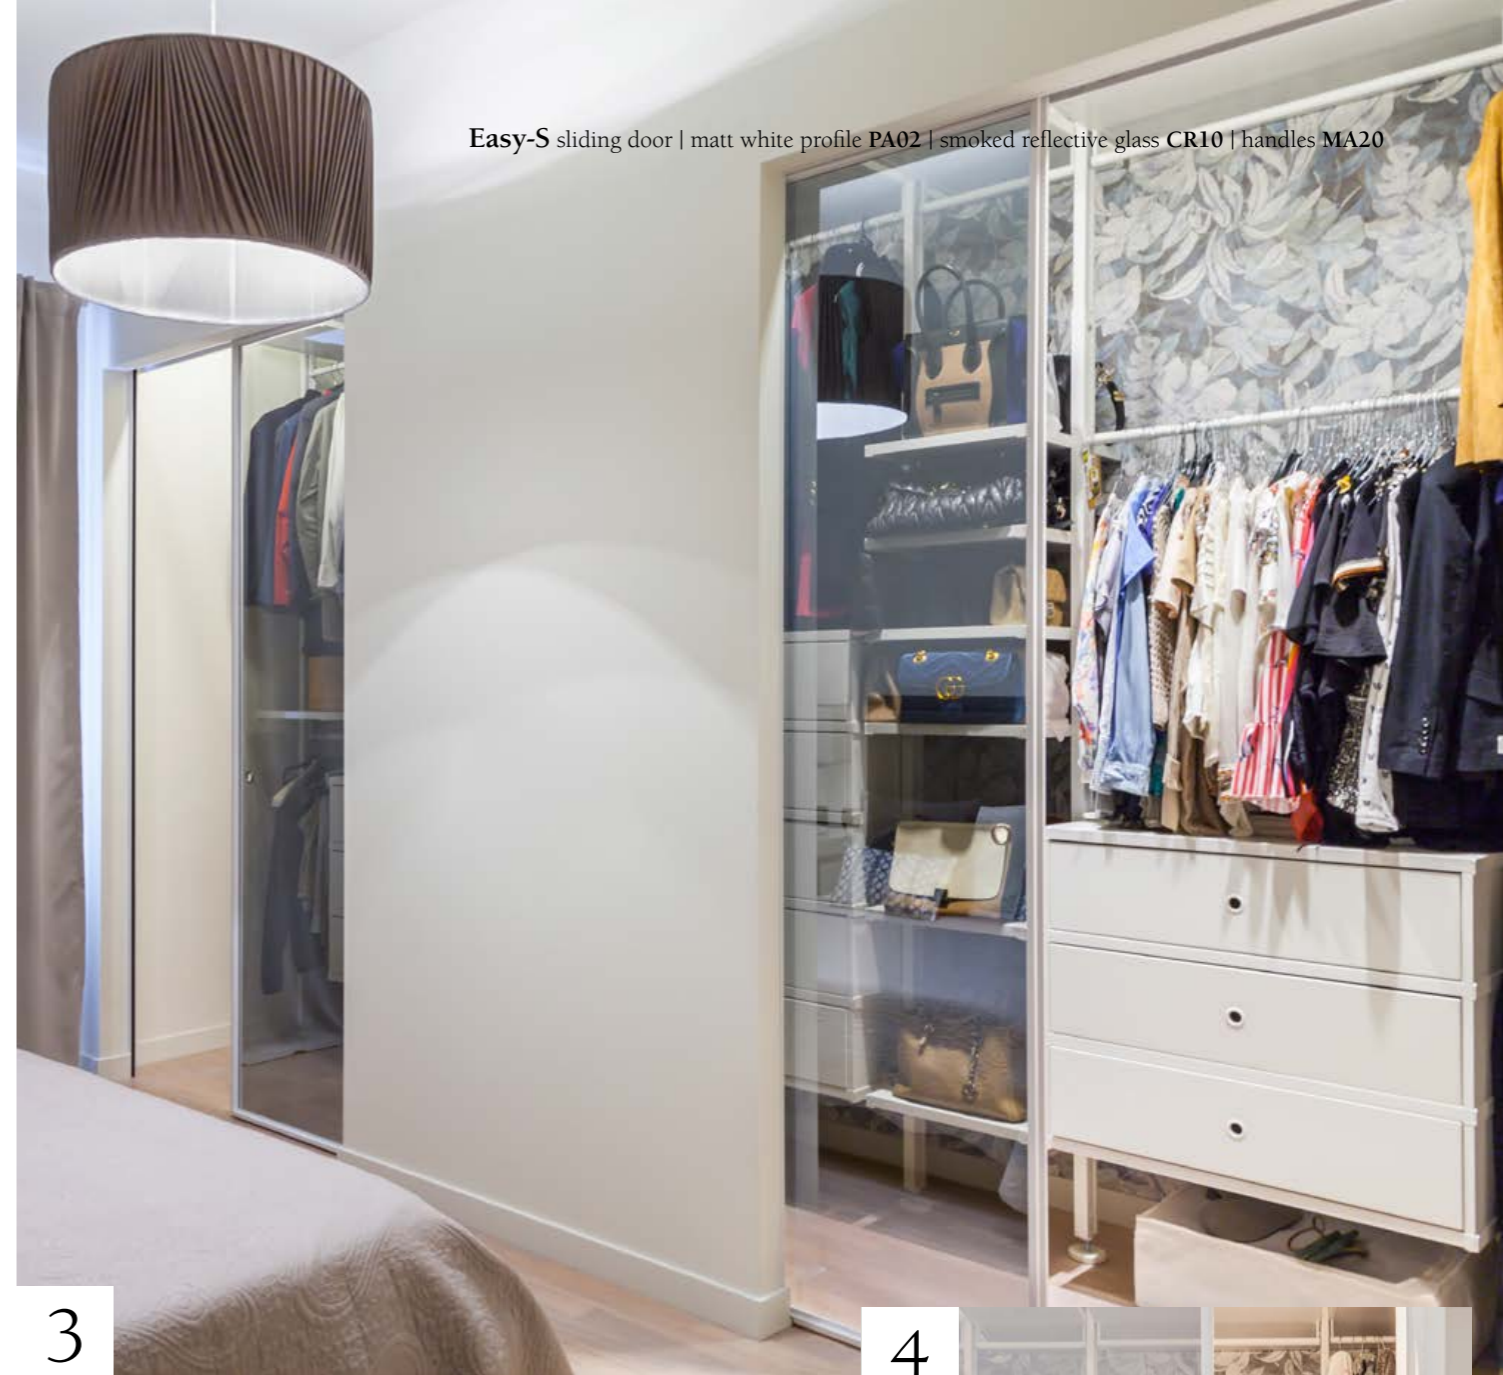

SMOKED REFLECTIVE GLASS

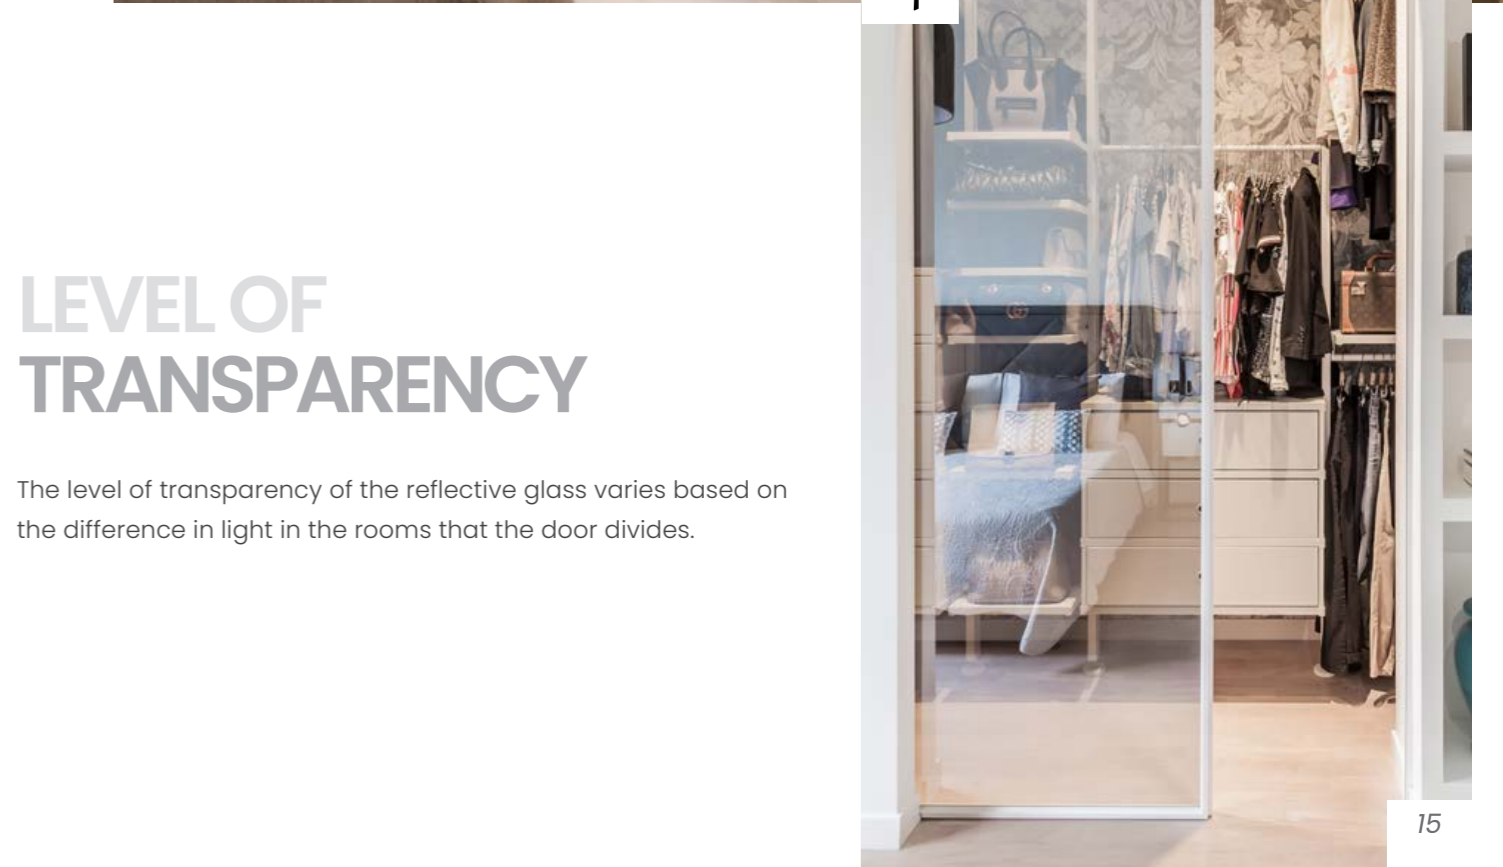

the level of transparency varies in relation to the light present

Photos 1 and 2 - when the glass is illuminated only from the outside the surface appears reflective/mirrored.

Photos 3 and 4 - vice versa, when light is present on the opposite side, the door changes appearance, becoming almost completely transparent.

Easy-S sliding door | matt white profile PA02 | smoked reflective glass CR10 | handles MA20

LEVEL OF TRANSPARENCY

The level of transparency of the reflective glass varies based on the difference in light in the rooms that the door divides.

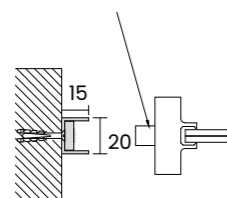

Easy-S sliding door | matt white profile PA02 | smoked reflective glass CR10 | handles MA20

DOOR SLAM POST

optional

10x10 mm profile
added to the door

In the photo, the Easy-S sliding door with transparent glass and profile in PA13 sanded iron gray finish.

The **optional wall-mounted jambs** provide a better seal between the door and the brickwork even in the presence of skirting boards.

Easy-S 2-panel sliding door | sandblasted iron grey profile PA13 | transparent glass CR01 | crosspieces Three | handles MA17

Easy-S 2-sliding + 2 fixed doors | matt black profile PA03 | transparent glass CR01 | crosspieces custom h20mm | handles MA17

FIXED&OPENABLE SYSTEM

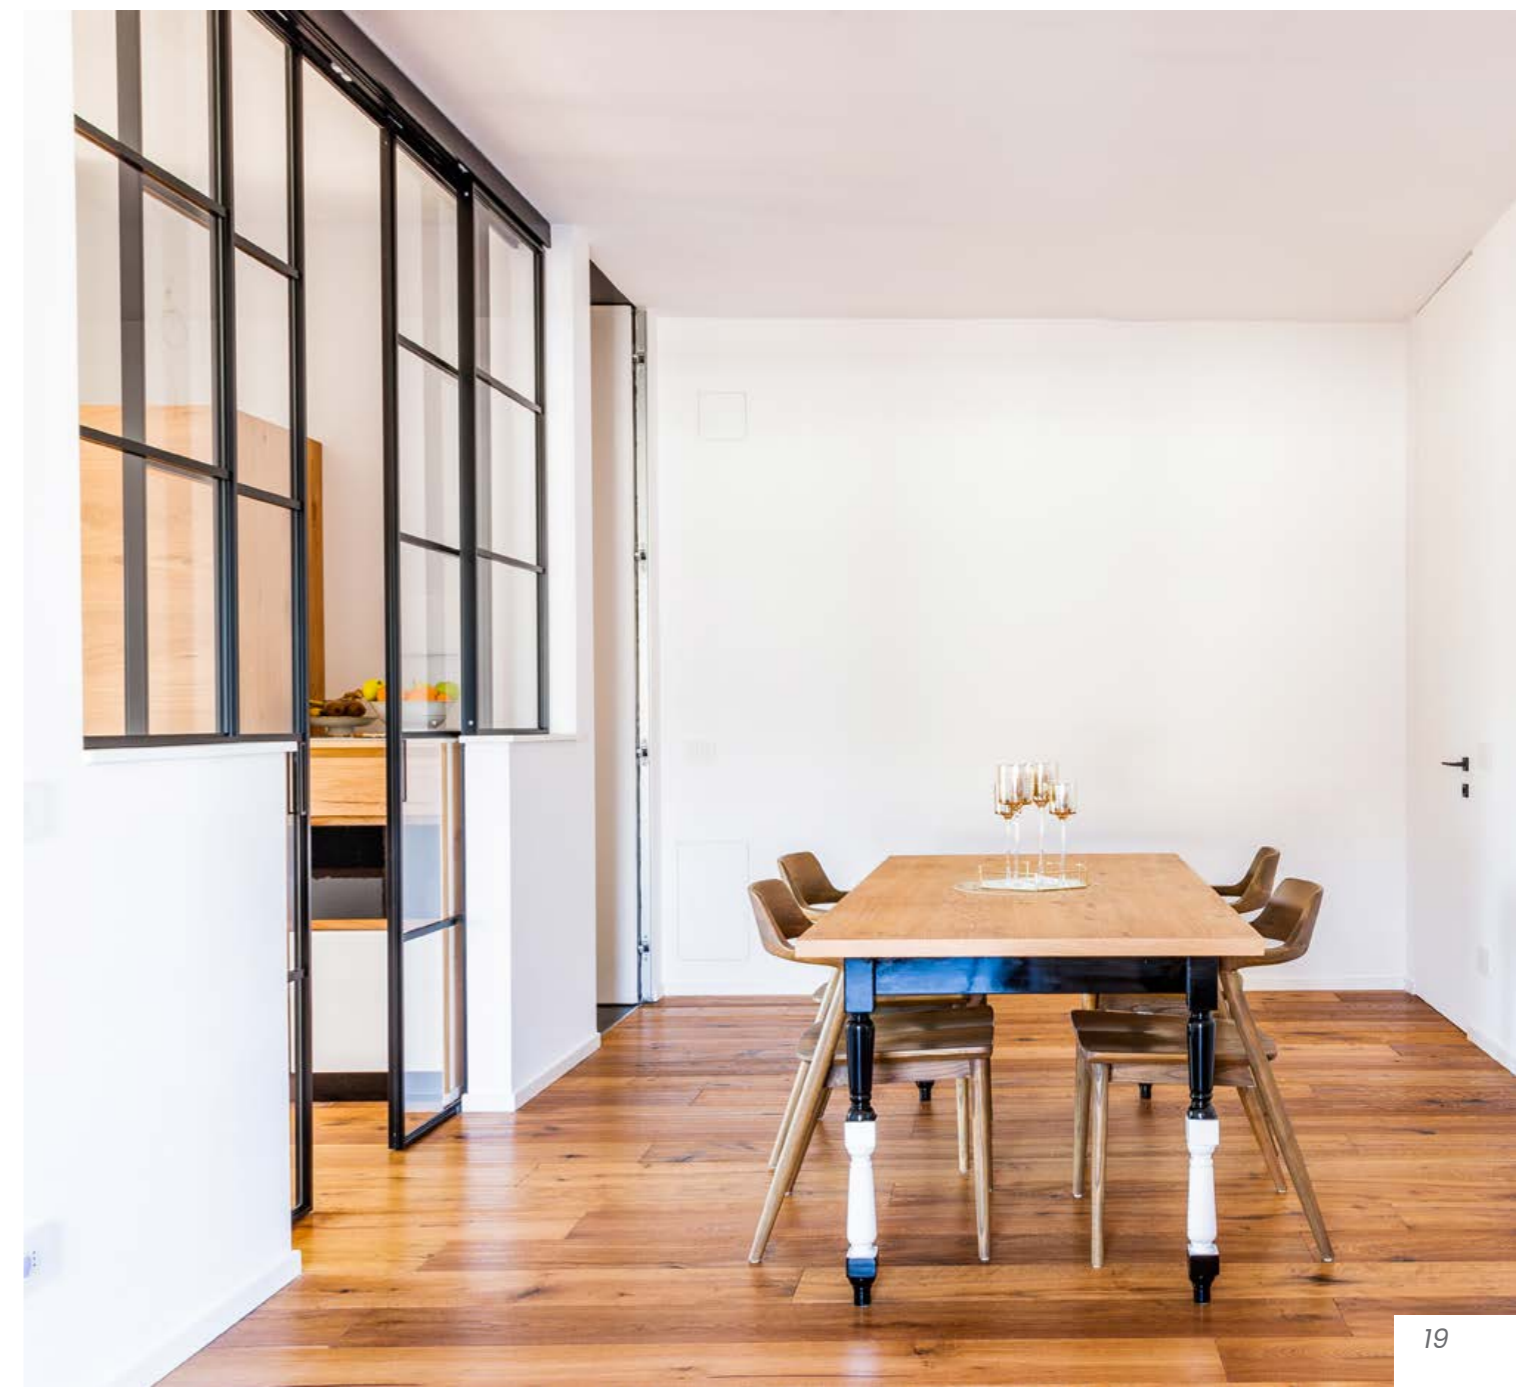

and telescopic brush

The Easy-S sliding door can be combined with Easy-S fixed doors.

The creation of the doors is always tailored to the millimetre, optional handles with integrated lock or the standard MA 17 handle without lock are available as in the photo below.

Optional profiles reduce the gap between the door and the side walls.

The profile finish is coordinated with that of the door.

OVERLAYABLE DOORS

*with drag
system*

This optional sliding version allows the doors to overlap on one side only, in this way the passage size is exploited to the maximum.

Easy-S 3-panel sliding door | matt black profile PA03 | smoked transparent glass CR05 | handle MA17

Easy-S 3-panel sliding door | matt black profile PA03 | smoked transparent glass CR05 | handle MA17

Easy-S 3-panel sliding door | bronze profile PA05 | double bronze reflective glass with internal satin finish CR11 | handle MA17

Master flush-to-the-wall door | bronze profil PA05 | bronze mirror SP02 + bronze mirror SP02 boiserie | handle MA15

Boiserie Easy-S & Master

In this project, designed by the architect Francesco Donnalioia of Space Studio (www.spacestudio.it), a particular creation is visible that combines the **sliding doors of the Easy-S collection** with a boiserie coordinated with the flush-to-the-wall door of the Master collection.

Easy-S 3-panel sliding door | bronze profile PA05 | double bronze reflective glass with internal satin finish CR11 | handle MA17

Easy-S scorrevole a 3 ante | profilo bronzo PA05 | doppio vetro riflettente bronzo con satinatura interna | maniglia MA17
Master battente | profilo bronzo PA05 | specchio bronzo SP02 + boiserie specchio bronzo SP02 | maniglia MA15

DOUBLE RIFLECTIVE GLASS

with internal satin finish

In these images, you can see the double reflective glass with layered satin finish inside the two panes, in this way you can combine the privacy of the satin glass with the aesthetic effect of the reflective crystals that maintain the ability to diffuse the light.

Crosspieces

To enrich the aesthetics of Easy-S, crosspieces made of extruded aluminum are available on request, applied on both sides of the glass.

The crosspieces dedicated to the Easy-S collection have a section of 12 x 12 mm horizontally and 10 x 10 mm vertically, they are positioned on both sides of the glass. The finish of the crosspieces is coordinated with the perimeter profiles of the door. Crossbars are not available for mirror doors.

For any customized compositions, ask for feasibility and prices at: commerciale@stainoestaino.it

Easy-S panel sliding door + 2 fixed panels | matt black profile PA03 | transparent glass CR01 | crosspieces Three | handles MA17

Design Apartment

A large Easy-S sliding door with a special height of 360 cm in this project designed by the architects Mariella Corsi and Laura Bianchi of ARCHBCSTUDIO (www.archbcstudio.com)

Identity Project

Easy-s sliding doors with crosspieces arranged based on a design by architects Lorenzo Cantini and Valentina Michelacci of Identity Design (www.identitydesign-group.com).

City Home

Numerous doors from the Staino&Staino Easy-S and Revolution® collections were included in the renovation of an important city villa.

Habitat Project

Easy-S door with four sliding doors with matt black extruded aluminum profile and transparent glass. MA 17 handle, with finish coordinated with the profile. Door created for Habitat Immobiliare, Prato.

Collection Extra Light

Extra Light is one of the most representative collections of STAINO&STAINO, with a frontal dimension of the perimeter profile of just 25 mm, it maintains the possibility of building very large doors (L 150 x 300 cm in H).

The result is a **minimal sliding door** in which the perimeter frame leaves the glass as the protagonist. The Extra Light sliding doors can be coordinated with the swing versions, which can also be made at full height, to maintain aesthetic continuity even in the case of different door types in the same environment.

The formal cleanliness of the **Extra Light** doors can be enriched thanks to the special versions with **crosspieces**, in the 40.20, 20.20, Factory and Wall models.

The 10 or 20 mm crosspieces can also be positioned according to the customer's design.

Extra Light 2-panel sliding door | corten profile and valance PA09 | transparent glass CR01 | crosspieces 40.20 | handles MA09

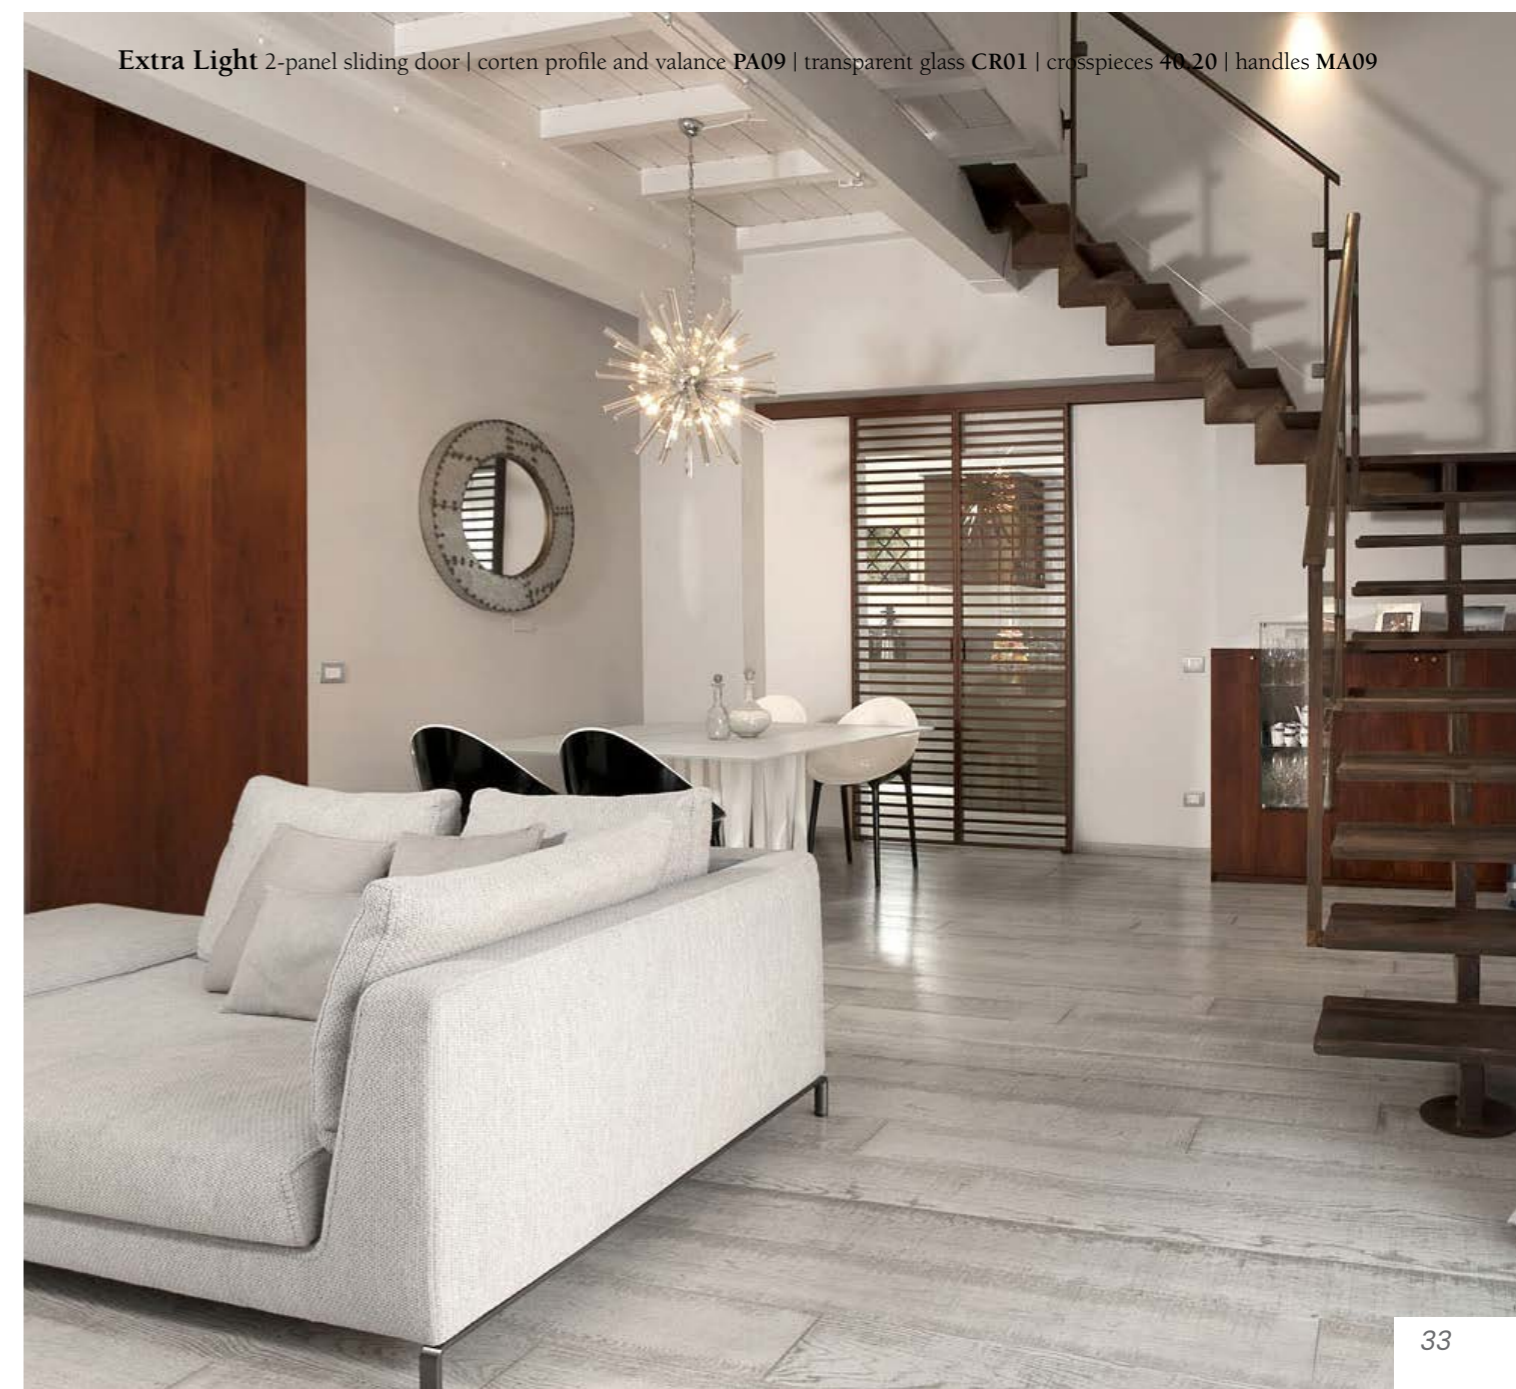

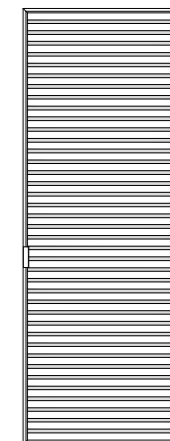

Extra Light 2-panel sliding door | corten profile and valance PA09 | transparent glass CR01 | crosspieces 40.20 | handles MA09

EXTRA LIGHT 40.20

The Extra Light door in the **40.20** scheme is characterized by 20 mm crosspieces arranged on the glass every 40 mm.

The customer can choose both the profile finish and the glass finish, while the sliding system can be of the classic type with covering valance or recessed.

For customized compositions, ask for feasibility at: commerciale@stainoestaino.it

Extra Light 2-panel sliding door | corten profile and valance PA09 | transparent glass CR01 | crosspieces 40.20 | handles MA09

Extra Light 3-panel sliding door | corten profile PA09 | transparent glass CR01 | crosspieces 20.20 | handles MA09

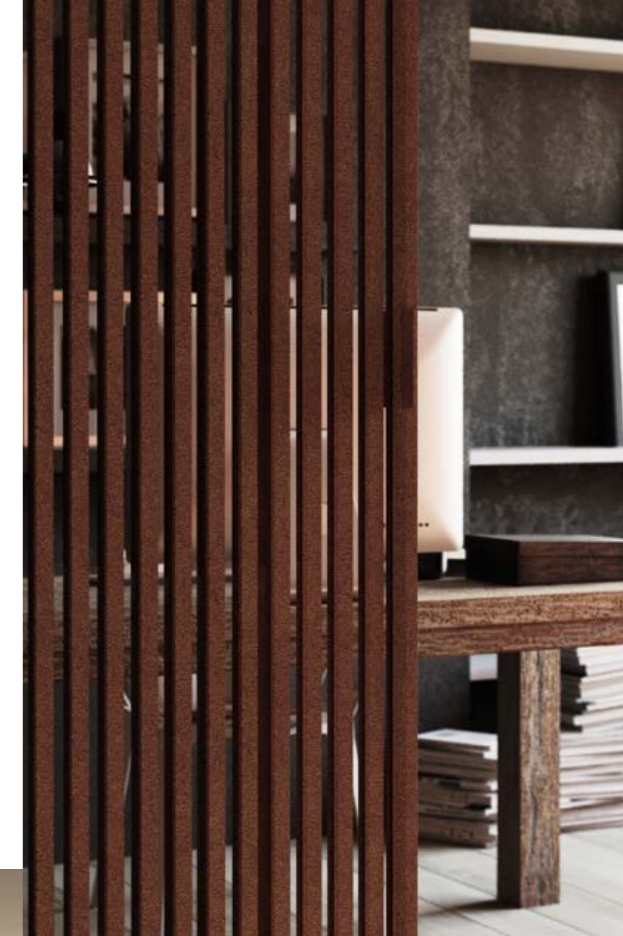

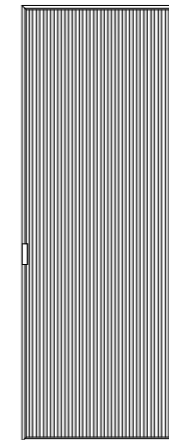

EXTRA LIGHT 20.20

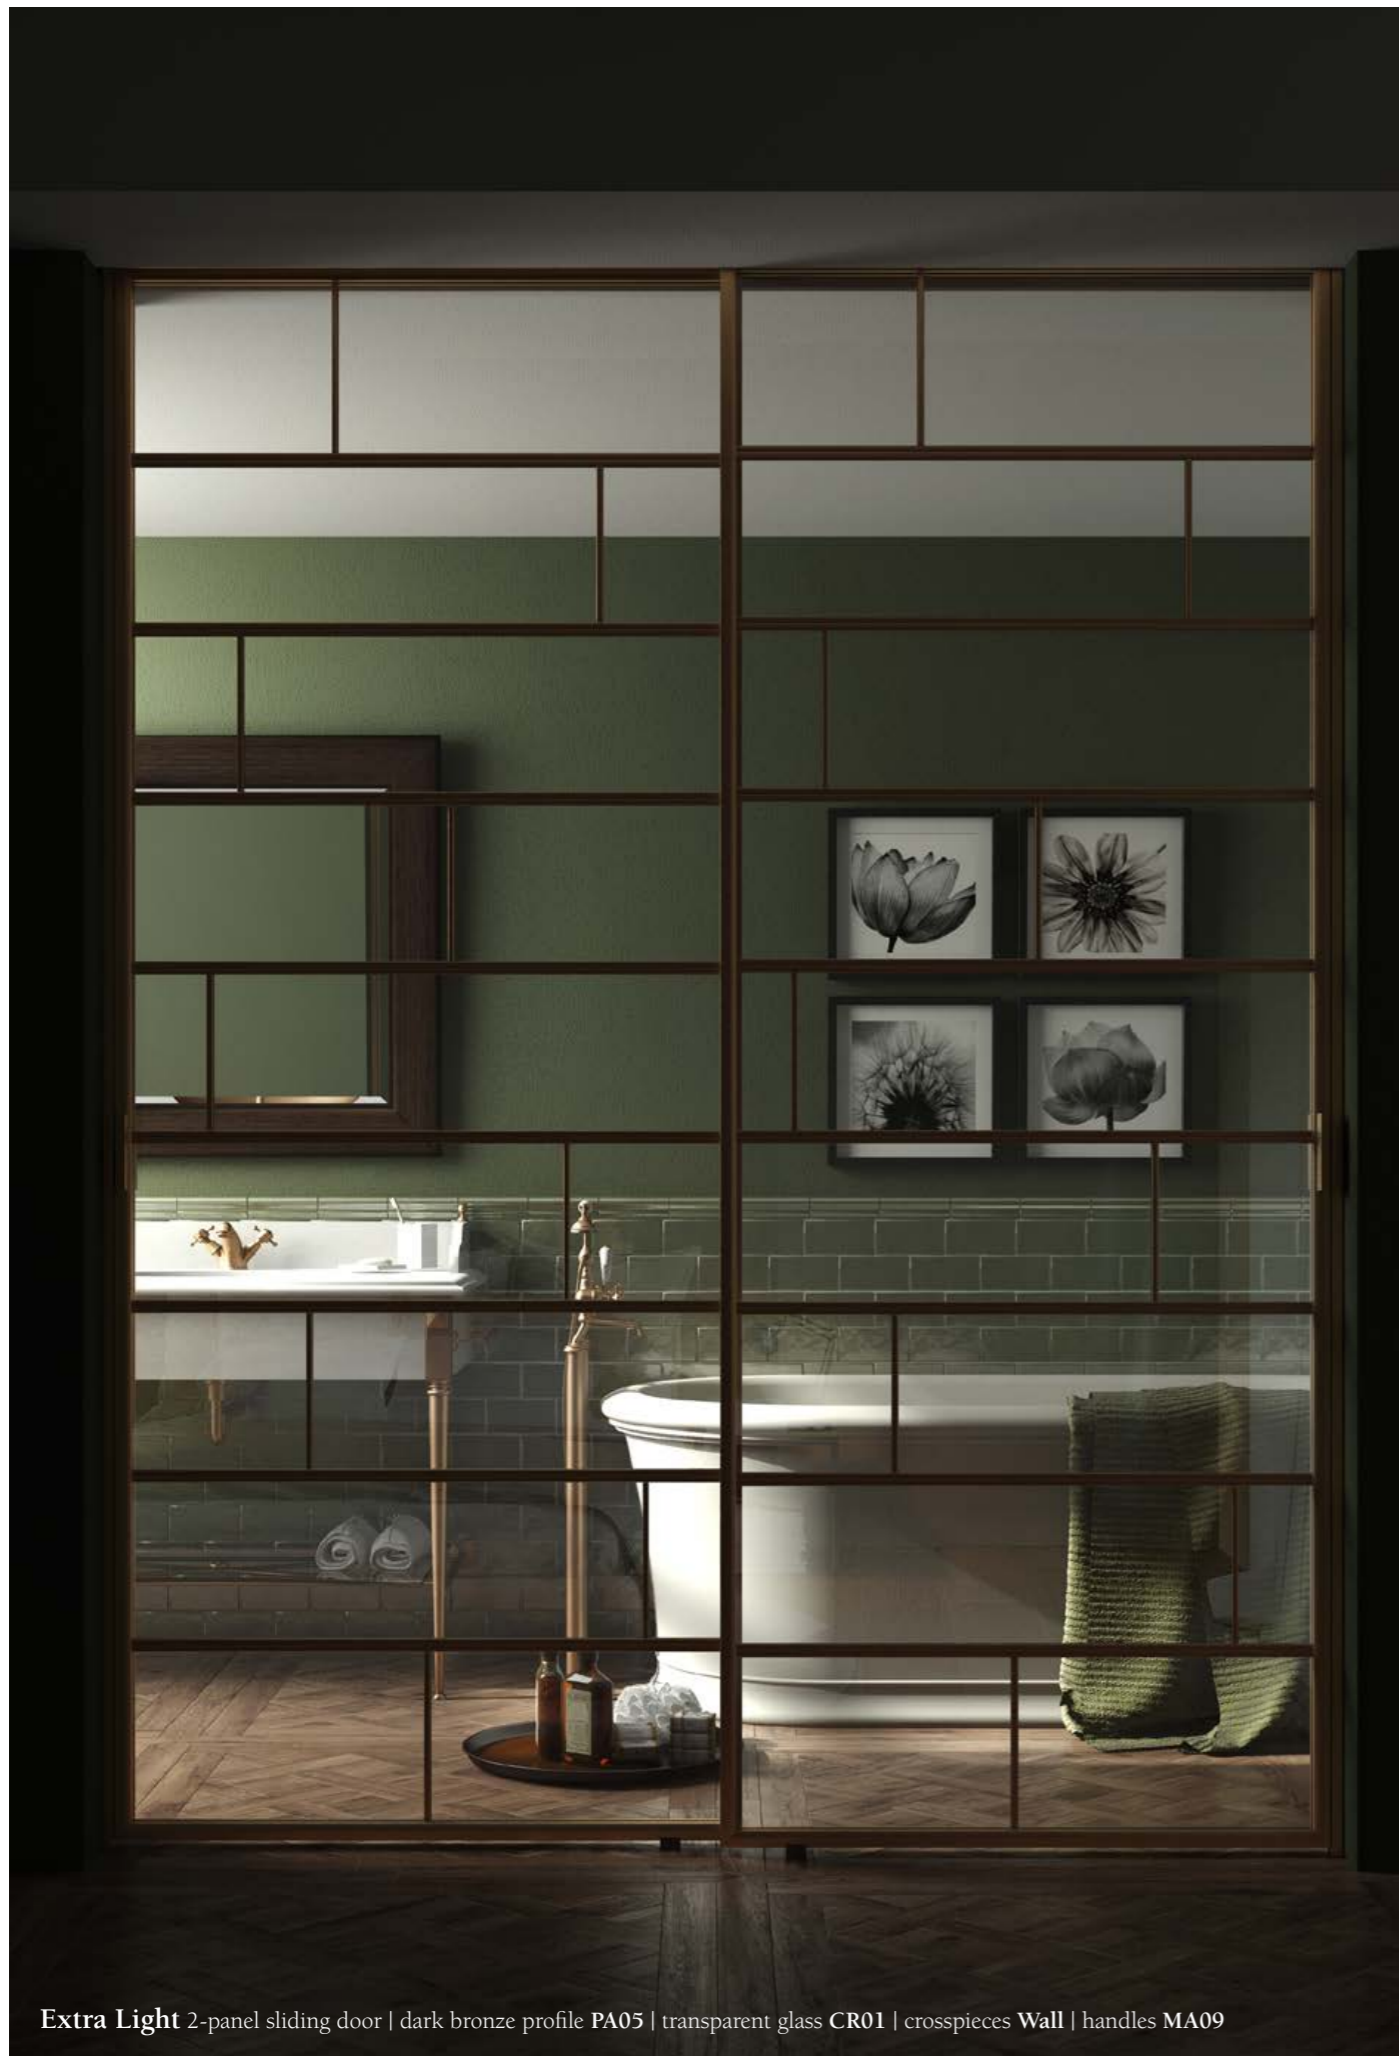

*transparency
effect*

The **20.20** scheme of the Extra Light door is characterized by the reduced spacing between the glass and the 20 mm aluminum crosspieces.

For customized compositions, ask for feasibility at:

commerciale@stainoestaino.it

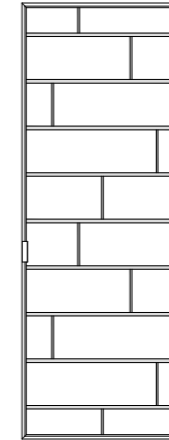

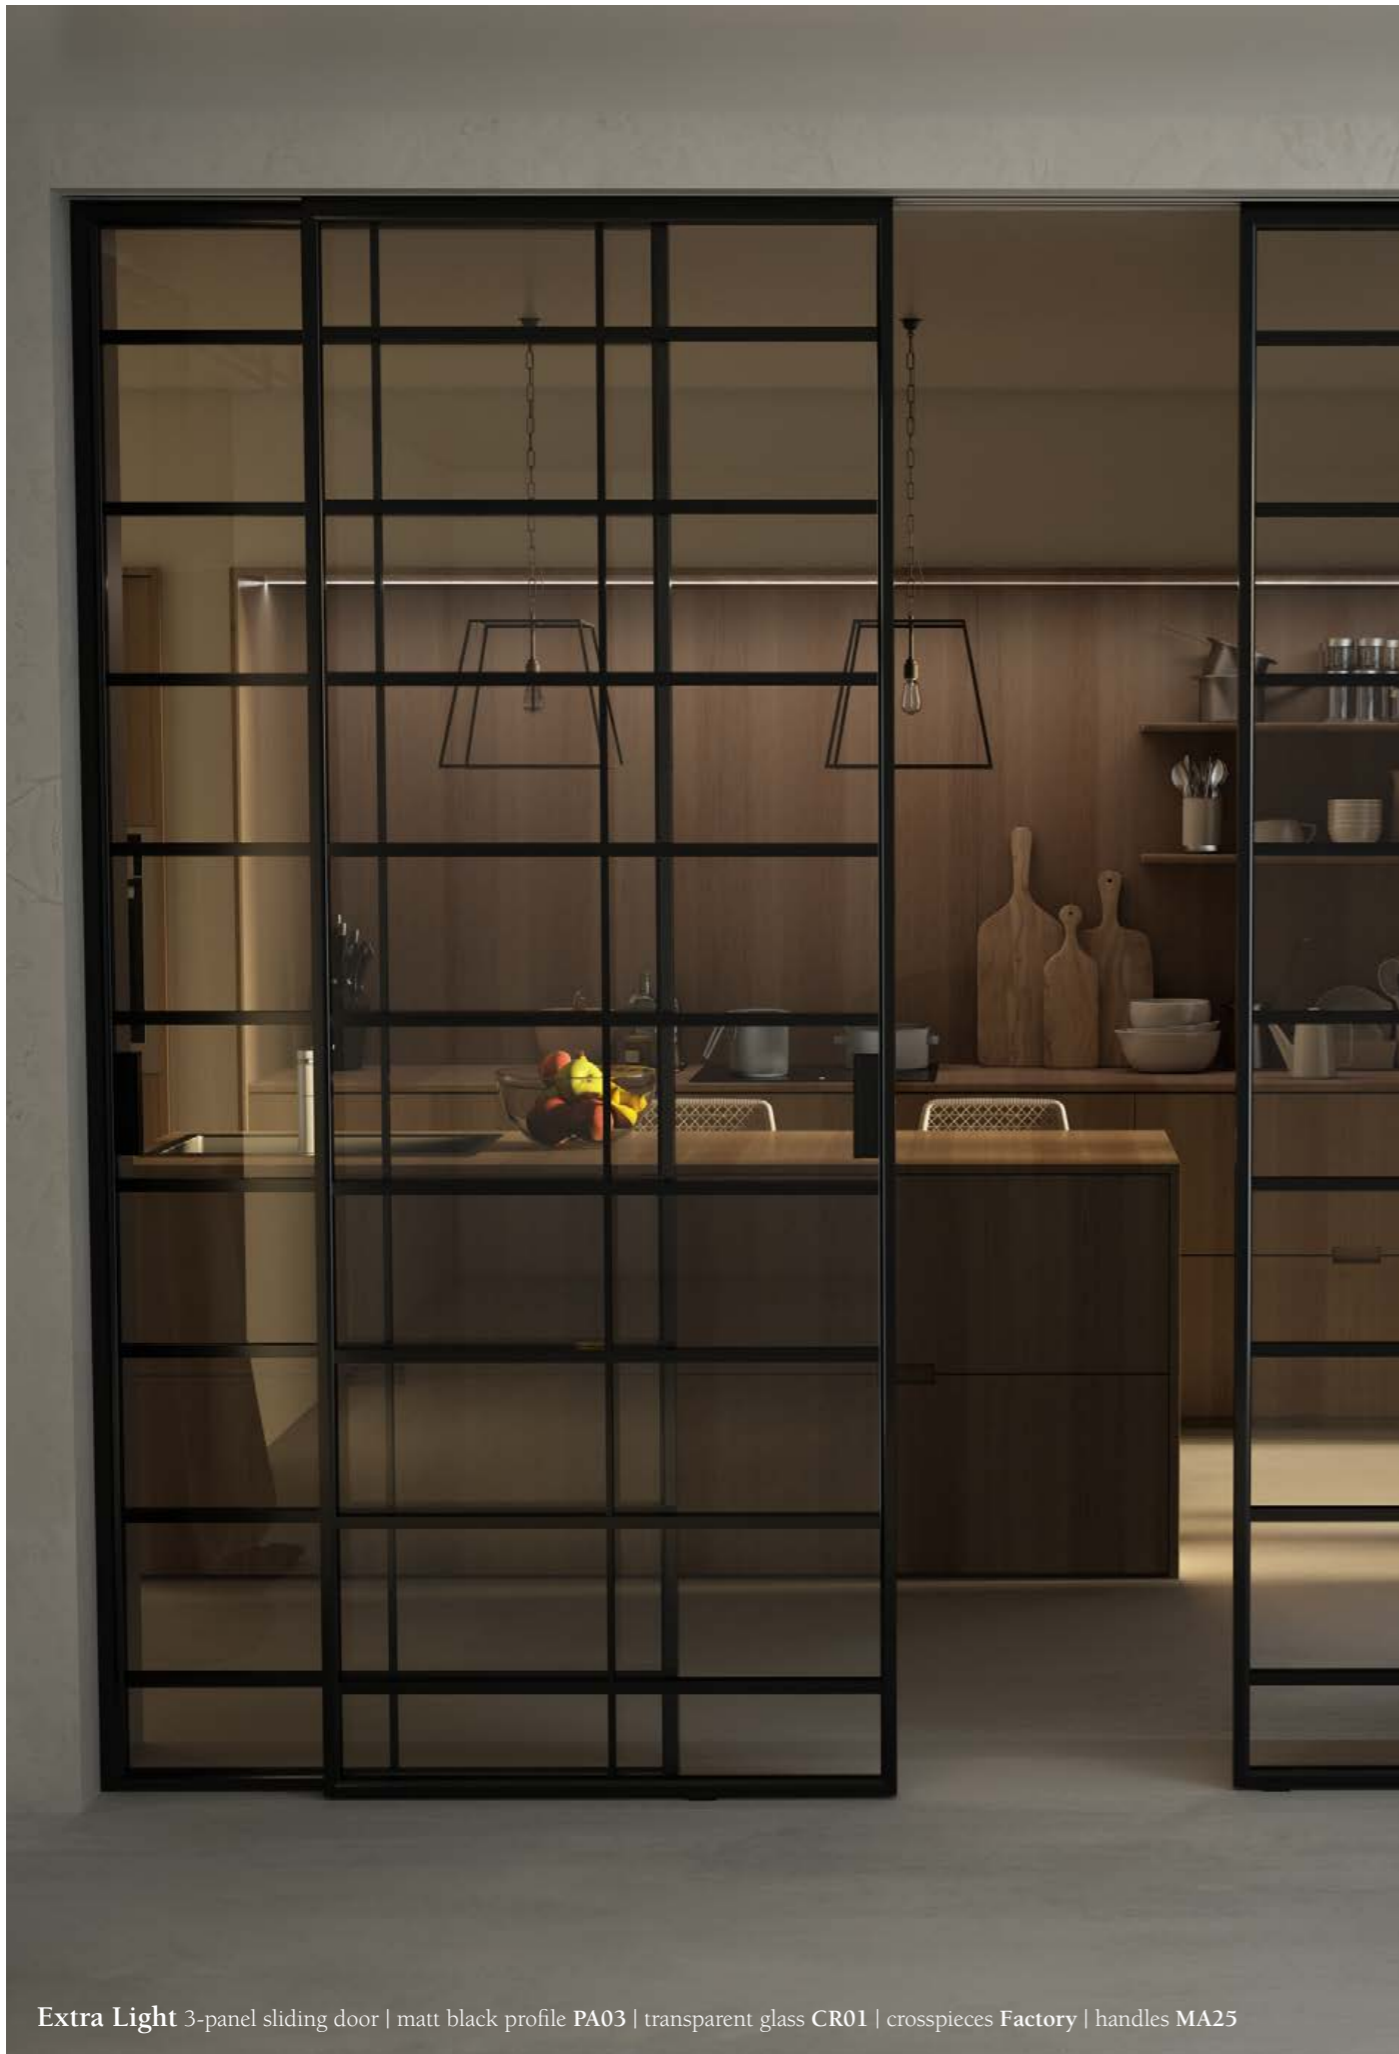

Extra Light 2-panel sliding door | dark bronze profile PA05 | transparent glass CR01 | crosspieces Wall | handles MA09

EXTRA LIGHT WALL

Extra Light with the **Wall scheme** with 20 mm horizontal and 10 mm vertical crosspieces.

The result is a brick-effect composition proportionate to the size of the door.

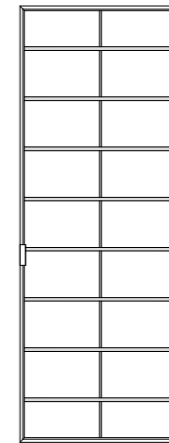

Extra Light 3-panel sliding door | matt black profile PA03 | transparent glass CR01 | crosspieces Factory | handles MA25

EXTRA LIGHT FACTORY

In the **Factory** scheme the 20 mm horizontal crosspieces are spaced 240 mm apart; the vertical ones are 10 mm.

Depending on the width, the door is equipped with one or two vertical crosspieces.

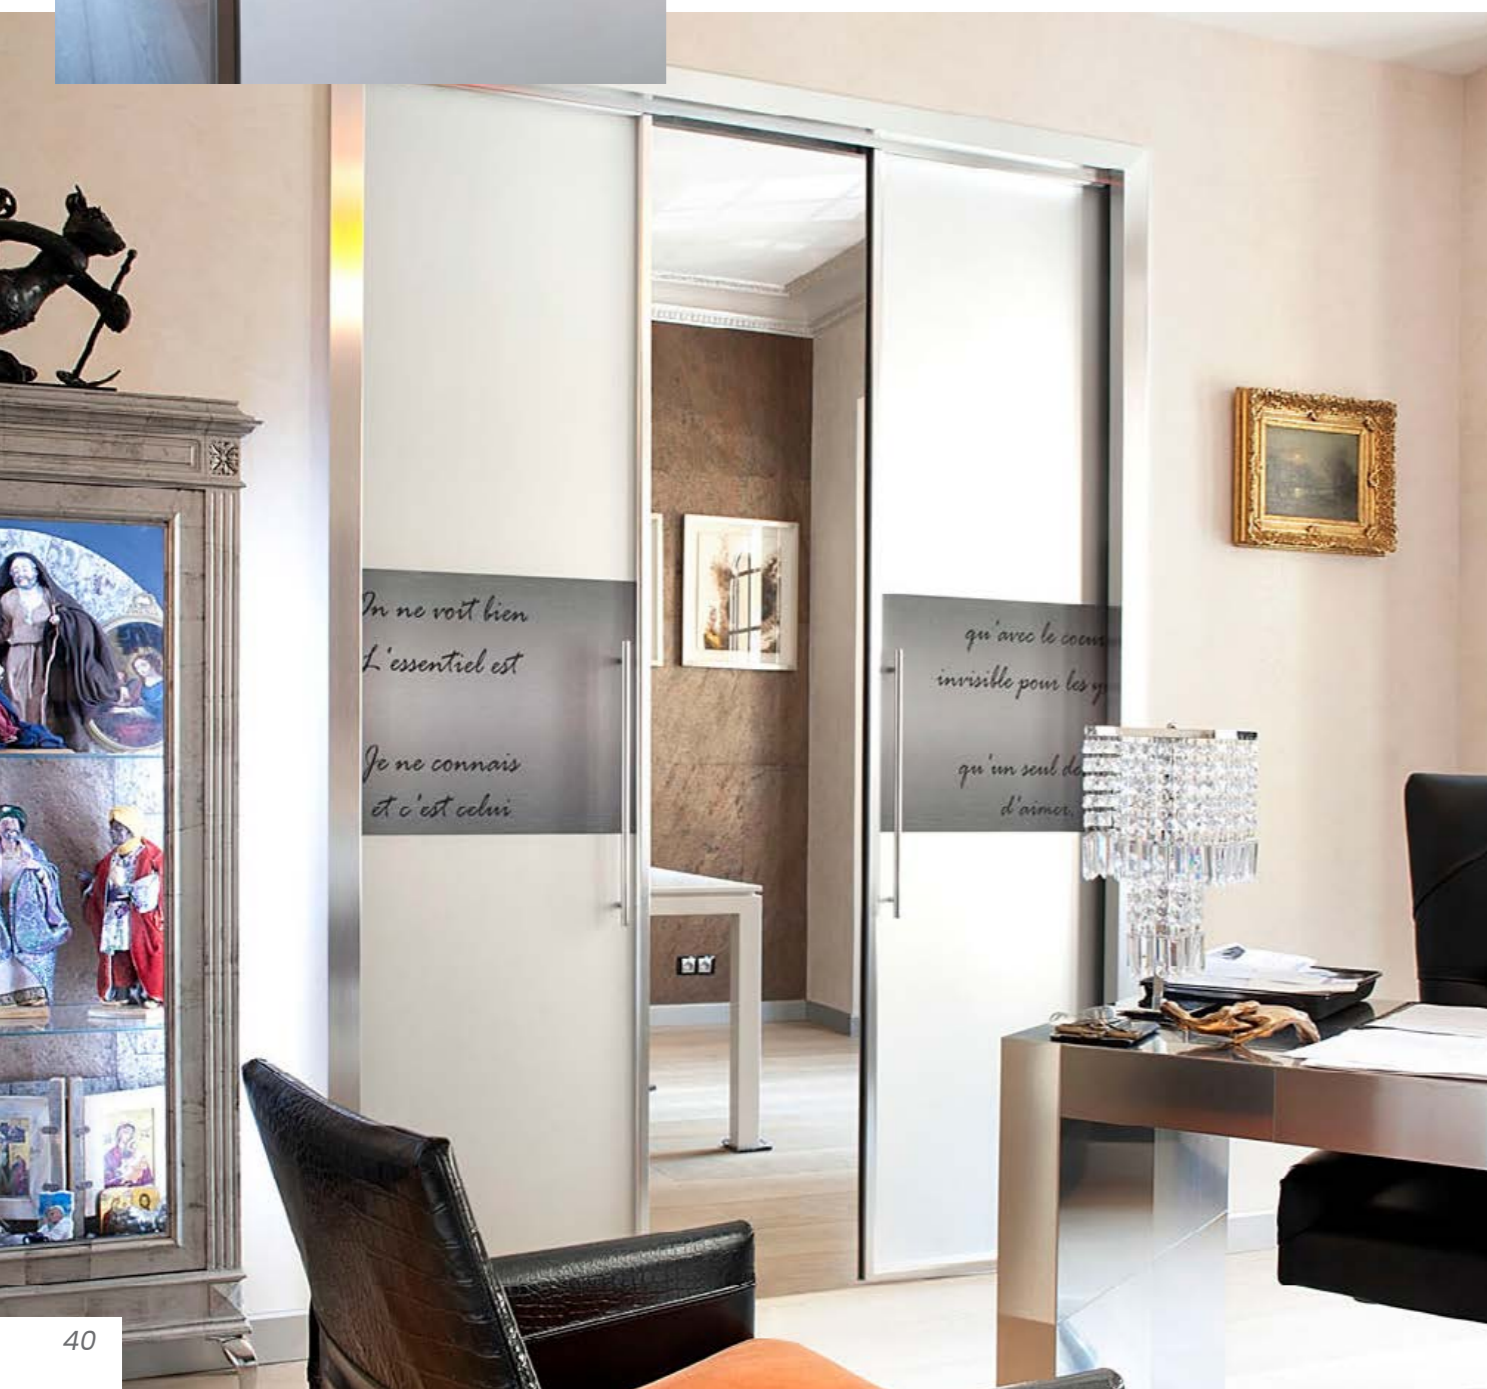

EXTRA LIGHT INTERNAL WALL

two-panels sliding door

The Extra Light sliding door inside the wall can be set up for insertion in classic or flush-to-the-wall sliding boxes of any brand.

The door can be equipped with an extruded aluminum frame and architraves. The aluminum architraves are available in a wide range of finishes or can be made in a matt color as per sample.

Extra Light 2-panels sliding door | profile and casing **custom finishing** | extra-clear satin glass CR07 with custom decorations | handle MA05

Fixed all-glass doors + ExtraLight

Fixed all-glass panels + Extra Light sliding doors.

In combination with the Extra Light sliding panels, entirely glass doors are available with fixing profiles positioned only on the floor and ceiling.

The profiles for fixing the fixed doors have a reduced section and can be made with a finish coordinated with the Extra Light profiles.

Extra Light 20.20 2-panels sliding door | dark bronze profile PA11 | transparent profile CR01 | crosspieces 20.20 | handles MA27

Extra Light20.20 2-panels sliding door | dark bronze profile PA11 | transparent profile CR01 | crosspieces 20.20 | handles MA27

TRANSPARENT ELEGANCE

Particularly light is the coupling of the glass doors with a polished edge, accompanied by joint profiles in transparent polycarbonate.

The fixing profiles for the all-glass doors are available in all the finishes foreseen for the Extra Light doors.

Crosspieces

To enrich the aesthetics of Extra Light, crosspieces made of extruded aluminum are available on request, applied on both sides of the glass.

The crosspieces dedicated to the Extra Light collection have a section of 20 x 10 mm horizontally and 10 x 8 mm vertically, they are positioned on both sides of the glass. The finish of the crosspieces is coordinated with the perimeter profiles of the door. Crossbars are not available for mirror doors.

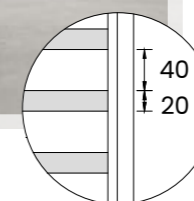

For any customized compositions, ask for feasibility and prices at: commerciale@stainoestaino.it

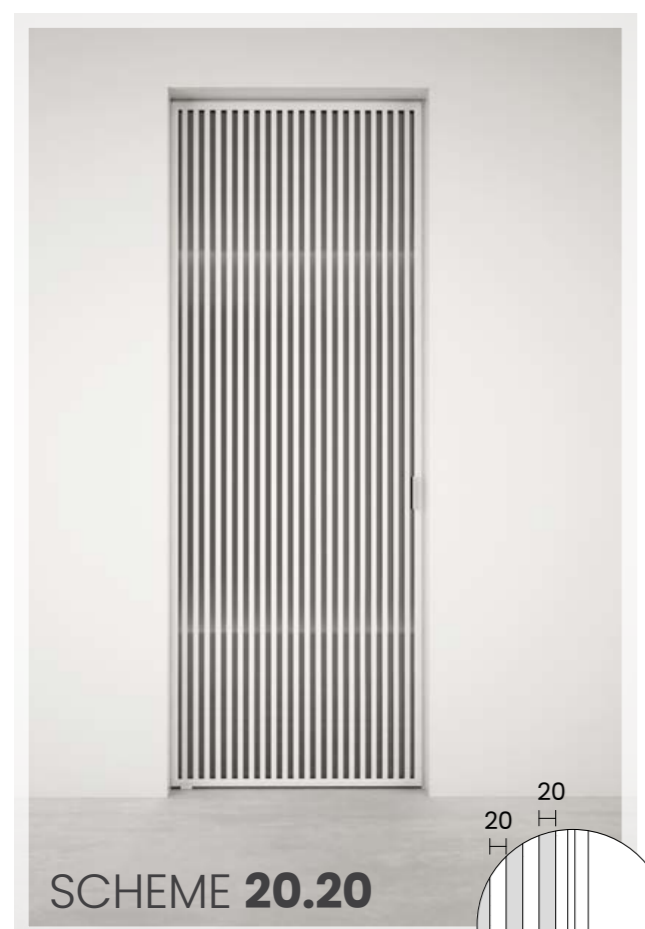

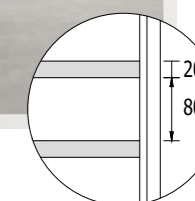

Without crosspieces

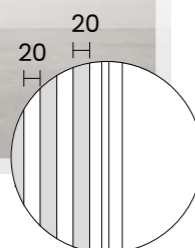

20 mm horizontal crosspieces spaced 40 mm apart.

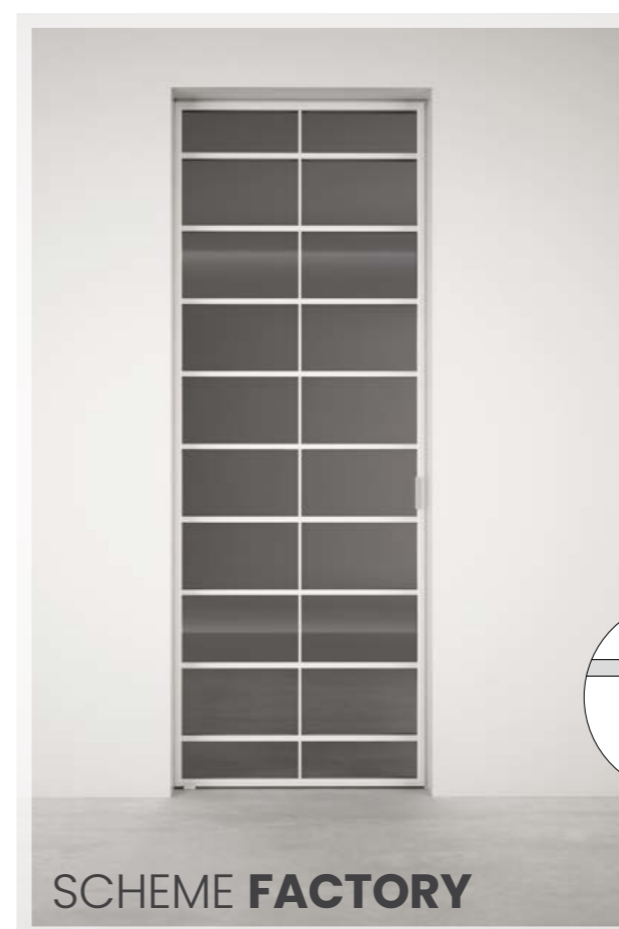

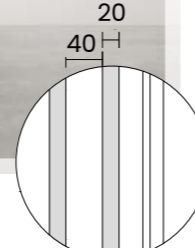

20 mm horizontal crosspieces spaced 80 mm apart.

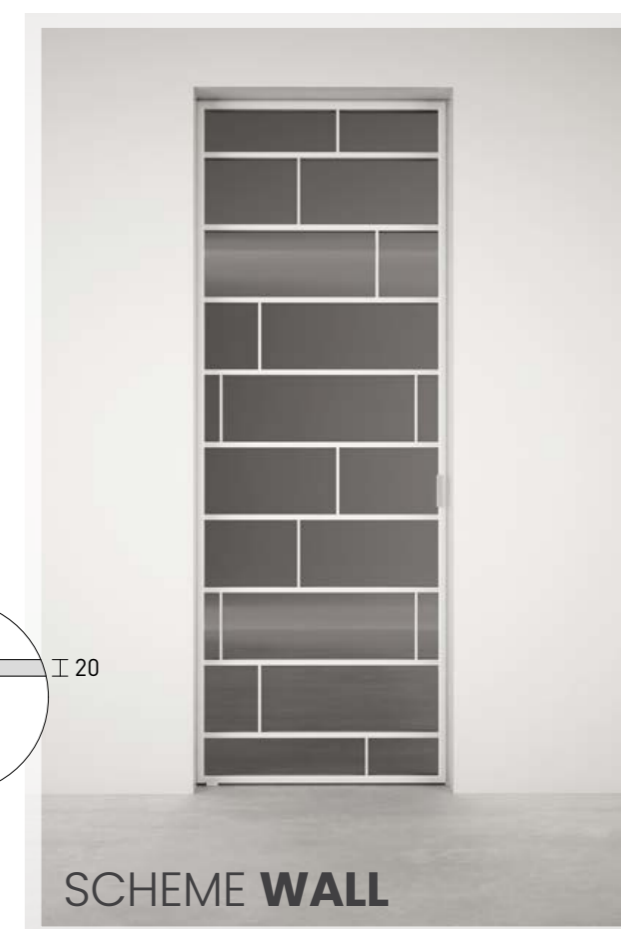

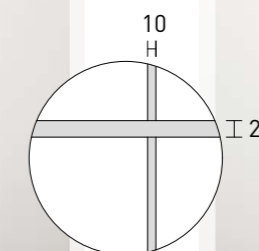

20 mm vertical crosspieces spaced 20 mm apart.

20 mm vertical crosspieces spaced 40 mm apart.

20 mm horizontal crosspieces spaced 240 mm apart. 10 mm horizontal crosspieces. The positioning of the crosspieces is adapted based on the size of the door ordered.

In both models, the first and last horizontal crosspieces are positioned to measure based on the height of the door.

CATALOGUE

Master 2-panels sliding doors | satin silver profile PA01 | lacquered glass CL04 | handles MA07

Collection Master

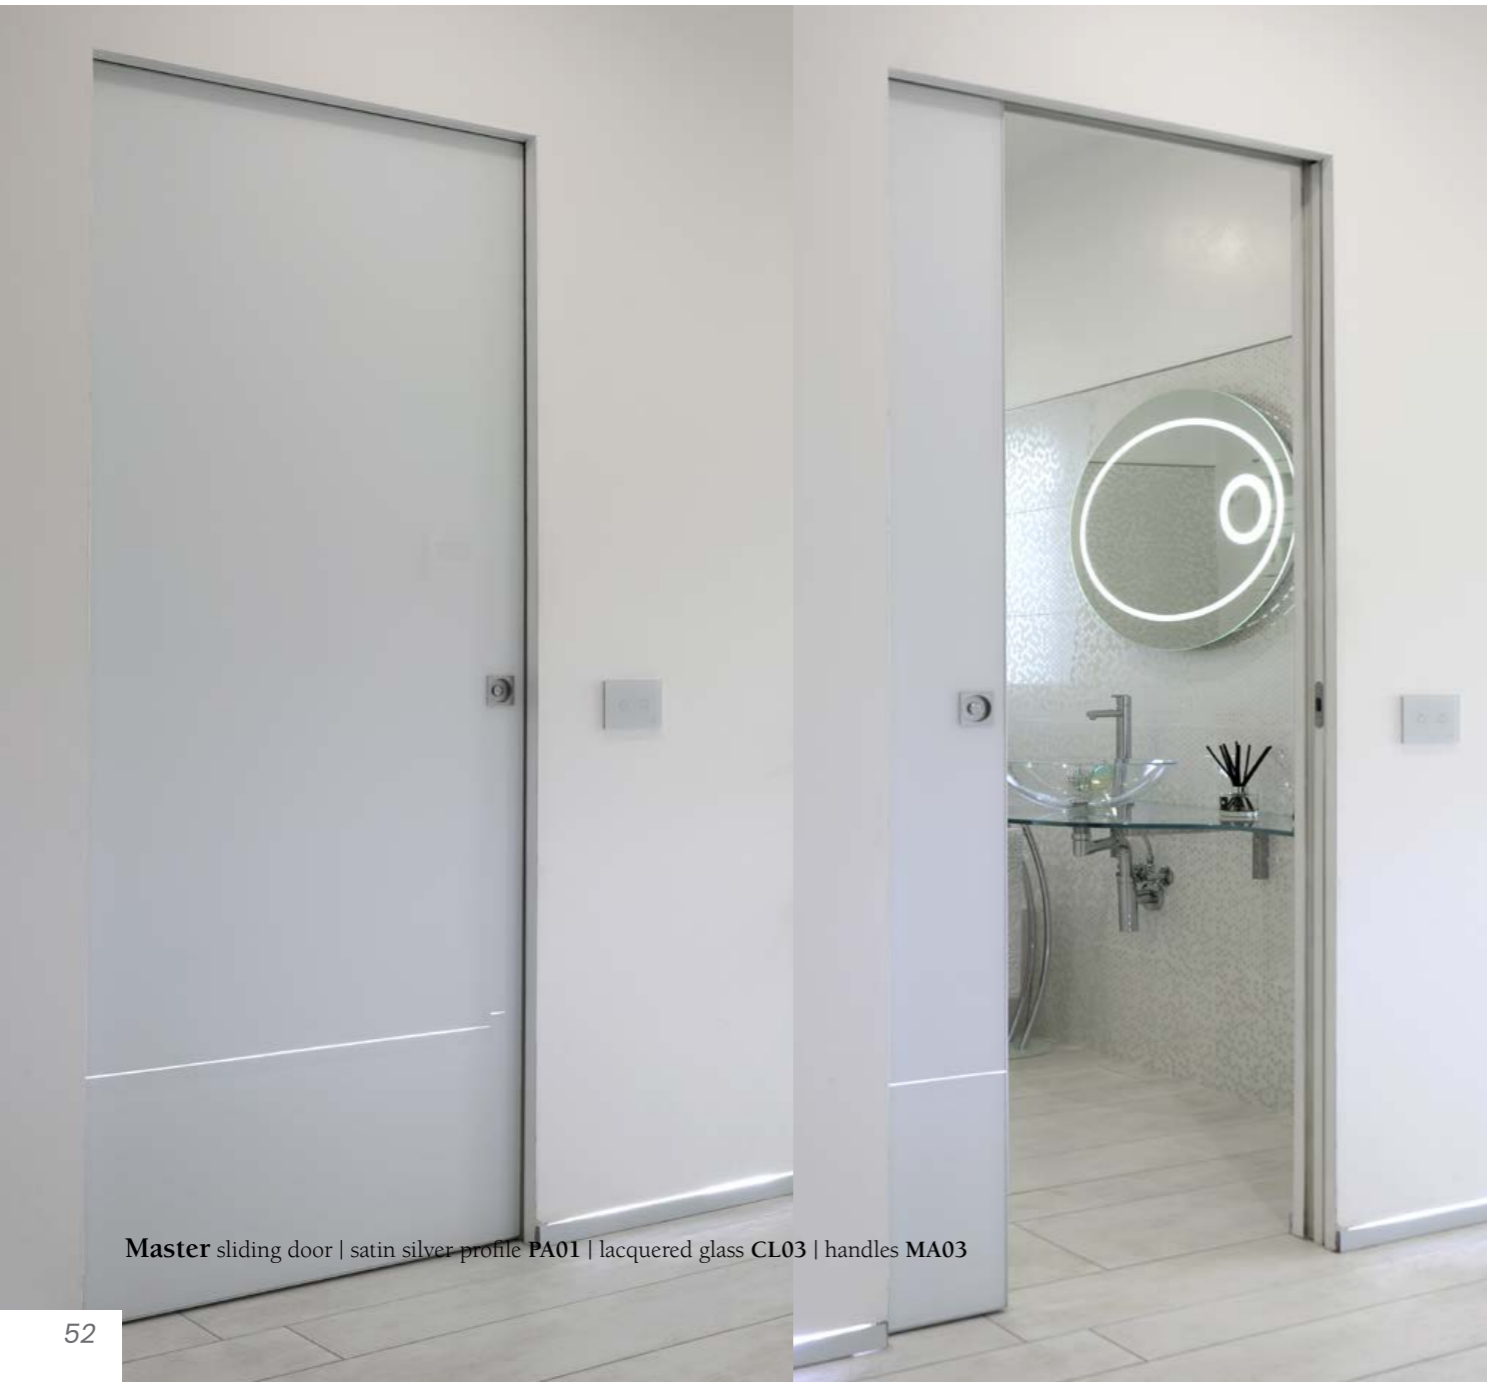

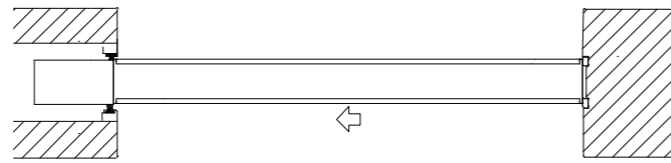

The **Master** door is characterized by the flatness between the glass and the perimeter profile of the door. The extruded aluminum edge remains visible for only 2.5 millimeters but its section extends inside the door with very large dimensions such as to allow the creation of doors with a height of up to 350 cm.

By choosing **Master** doors, the customer is free to customize every aspect of the door. In addition to the vast range of finishes and colors available, sample colors can be created for both the glass and the aluminum parts.

SLIDING MASTER DOOR

flush-fitting cassette system

The **Master sliding door inside the wall** can be set up for insertion in sliding cassette system that do not require the assembly of casings. Upon customer request, the company can supply both the door and the sliding subframe.

Master sliding door | satin silver profile PA01 | lacquered glass CL03 | handles MA03

Master sliding door | satin silver profile PA01 | lacquered metropoli mirror CL09 | handles MA03

SLIDING MASTER DOOR

classic pocket cassette system

The Master internal wall sliding door can be set up for insertion into **classic sliding cassettes** of any brand, in this case the door is equipped with an **extruded aluminum frame and casing**.

The aluminum casing is available in a wide range of finishes, including matt sample colours.

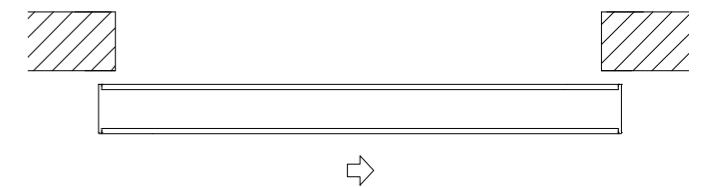

Master sliding door | satin silver profile PA01 | glass with DV13 decoration | handles MA03

SLIDING MASTER DOOR

outside the wall

The external wall sliding Master door **is always made to measure** without feasibility limits.

The finish may be different between one side of the door and the other; among the wide range of glass available there are glasses decorated with DV photographic print which can be personalized with images and drawings upon customer request.

CATALOGUE

Collection Glass

Glass is a system designed to create completely glass doors. The Glass sliding doors can also be coordinated with the swing and pivot versions. For Glass sliding doors, aluminum sliding systems are also available with multiple tracks, both with the classic covering valance and in the built-in versions. For all Glass sliding doors, trolleys with integrated shock absorber are provided as standard for practical soft closing operation.

The **DS decorations** for Glass doors are made on sandblasted glass using digital printing; they allow the passage of light and are customizable in designs and colours.

Glass 2-panels sliding door | glass with DS01 sabled decoration | handles MA07

Glass 4-panels sliding door | satin silver valance PA01 | glass with DV13 decoration | handles MA06

PARTIAL DECORATION

*on glass strips
or portions*

The DV13 decoration was created in the central part of the glass on a sandblasted base, this allows the passage of light and makes the design visible also from the internal side.

GLASS WITH DOUBLE FINISH

*on the oneside and
on the other*

The door from the Glass collection with mirror, upon request, can have a different finish between the two sides, for example the outside in mirror and the inside in lacquered glass.

DECORAZIONE SU VETRO SABBBIATO

*tecnologia digitale per
decorare il cristallo*

Il vetro viene decorato attraverso tre diverse lavorazioni. La prima fase consiste in una sabbatura classica, seguita da una seconda fase in cui il vetro viene decorato utilizzando un moderno sistema di stampa digitale. Infine, un trattamento protettivo viene applicato sulla parte sabbata del vetro, rendendo la superficie più facile da pulire.

Questa tecnologia permette la realizzazione di decorazioni sofisticate, con colori e disegni personalizzati. Il sistema utilizza vernici all'acqua che consentono il passaggio della luce.

CATALOGUE

Segreta-S | door painted on site

operating video of the
Segreta-S door

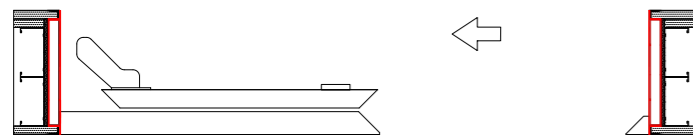

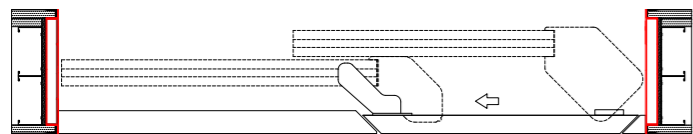

Segreta-S

sliding coplanar door

The **Segreta door** is also available in the exclusive coplanar sliding variant "**Segreta-S**", which can be made with one or two sliding doors.

This system provides a totally mechanical operation and allows the door to be opened with a simple pressure of the hand, consequently there is no handle on the side flush with the wall.

Given the complexity of manufacturing some components and the long times required for production, the "**Segreta-S**" coplanar sliding door is available in a limited number of examples.

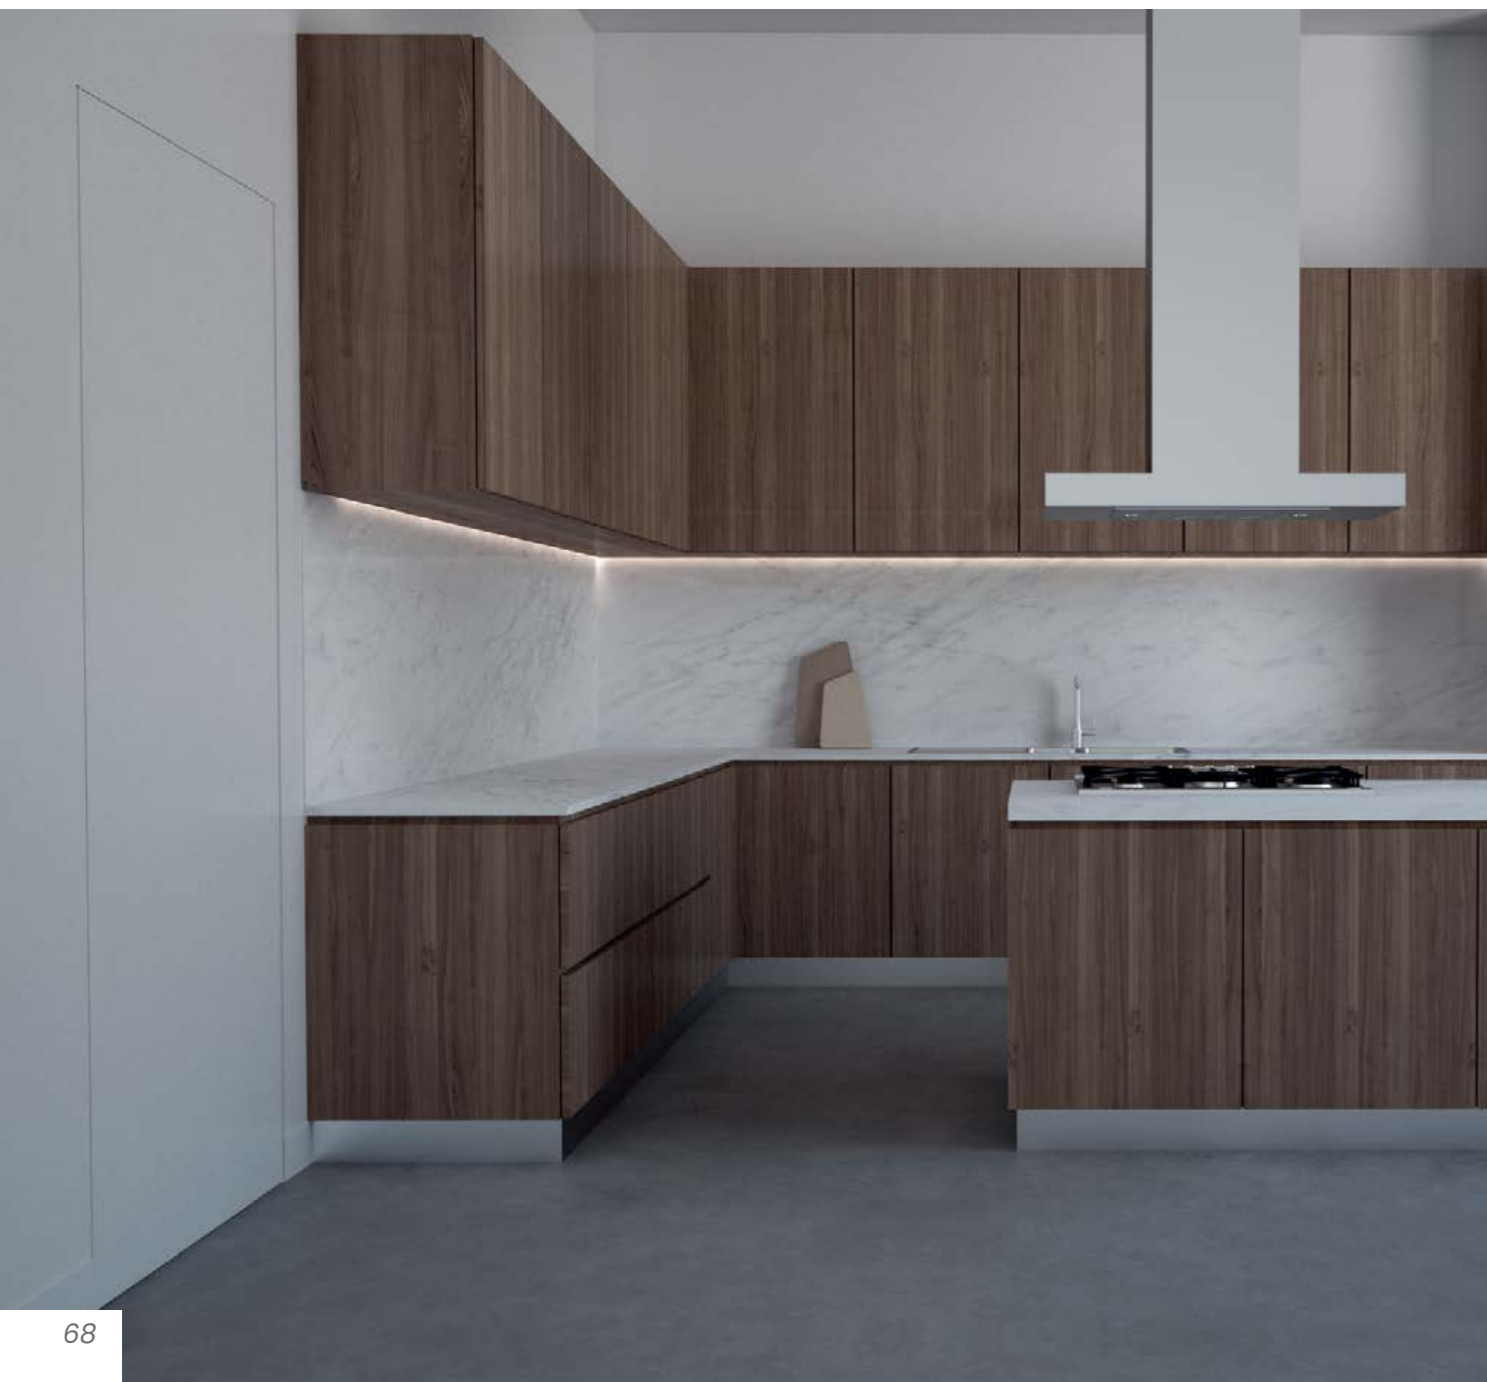

SLIDING SEGRETA-S

coplanar sliding system

The system includes a fixed and a sliding side door, the **fixed panel** becomes the wall behind which the **opening door slides**.

In addition to the two panels (fixed + openable), Segreta-S is equipped with a special perimeter frame where, already in the factory, the sliding system is fixed, all specifically designed to guarantee the **best possible flush-to-the-wall effect**.

Segreta-S | door painted on site

SLIDING SEGRETA

outside the wall

The **external wall** sliding door, made with 1 or more leaves, is always produced to measure up to 130 x 300 h cm.

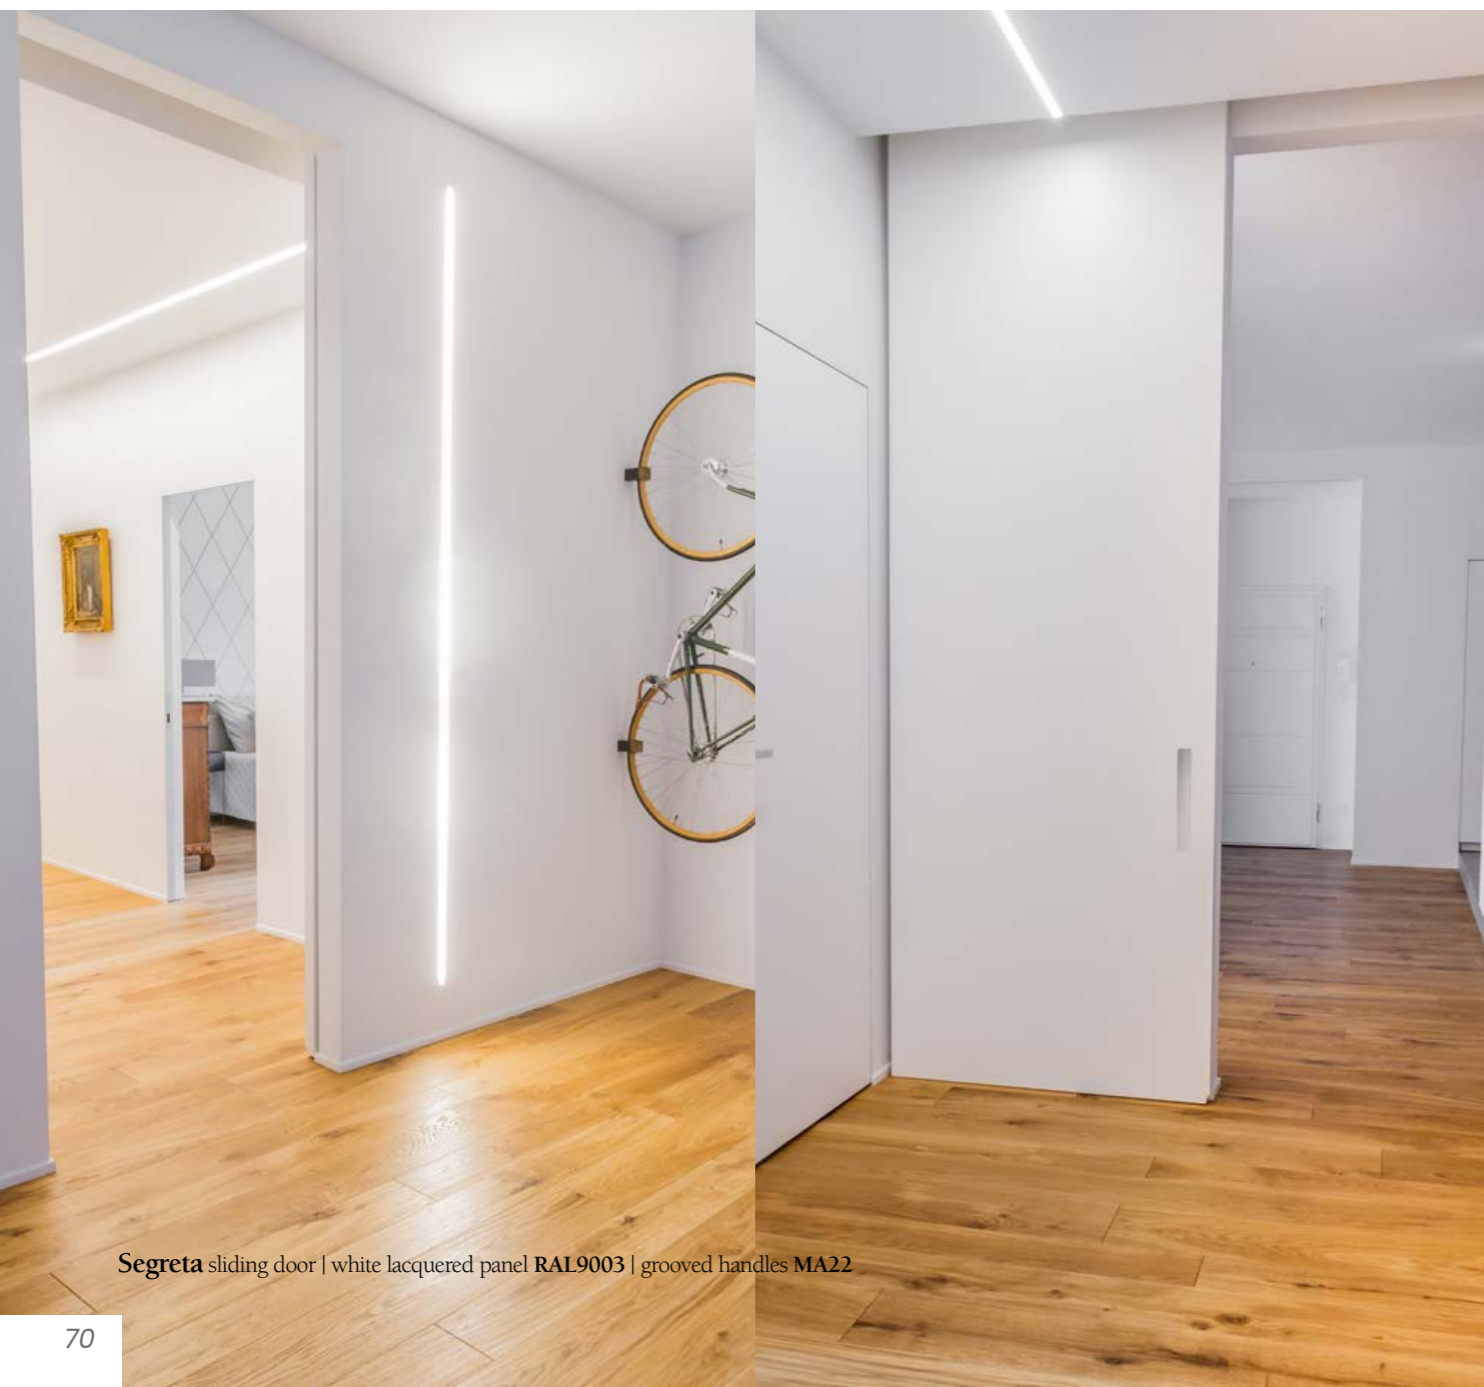

The doors can be supplied already lacquered or in a version to be painted.

The **sliding track** can be of the **built-in type** or in the **classic version** with covering valances.

Also for the sliding «Segreta», various types of optional handles are available such as the **MA 22 groove handle** model in the photo.

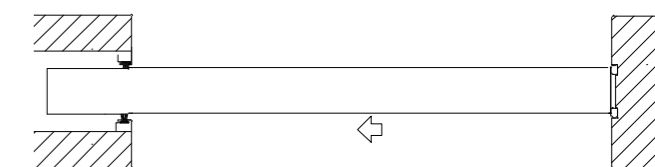

Segreta sliding door | painted on site | niches MA03

Segreta sliding door | white lacquered panel RAL9003 | grooved handles MA22

SLIDING SEGRETA

inside the wall

The Segreta door is available in an internal-wall sliding version and is compatible with all counterframe models on the market.

The company can supply the **complete door** and **counterframe kit**, or just the prepared door.

Internal sliding secret wall is equipped with recessed handles in satin chrome (as in the photo) or matt white; other types of handles are available on request.

You can download the technical sheet dedicated to the Segreta Collection from our website www.stainoestaino.it.

CATALOGUE

Collection Versus

The **Versus sliding system** is specifically designed to create wall wardrobes tailored to the millimeter and, thanks to its technology, allows you to close any type of space from wall to wall and from ceiling to floor.

The system developed around this profile allows you to create doors that can accommodate glass, decorated glass or mirrors.

The aluminum is available in a satin version, lacquered in various matt colours, in bronze and dark bronze finishes, or in a sample matt colour. The ground track guarantees insulation from the outside and better protection from dust as well as supporting the weight of the doors which can thus be mounted without problems even in the case of false ceilings.

To best equip the wardrobe compartment, a series of accessories are available such as shelves, coat hangers and drawers, also made to measure.

Versus 6-sliding panels closet | satin silver profile PA01 | lacquered glass on sample | handles MA07

Versus sliding system | satin silver profile PA01 | lacquered glass on sample | handles MA07

FLOOR TRACK

The floor track guarantees excellent protection from dust as well as supporting the weight of the doors which can thus be mounted without problems even in the case of false ceilings.

The sliding tracks can be recessed into either the floor or the ceiling.

Versus 4-sliding panels closet | matt white profile PA02 | white lacquered glass CL03 | handles MA09

MA09 HANDLE

Specially designed for the four-door version, the **MA-09** handle allows a correct grip even at the meeting point of the two central doors.

Sliding Easy-S door

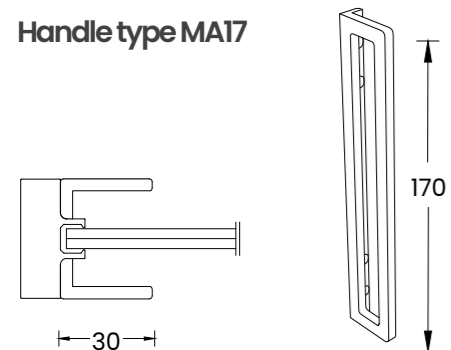

SLIDING DOOR

The Easy-S sliding door is always made to measure with maximum dimensions of 130 x 300 h cm (net passage).

The Easy-S sliding door is equipped with a pair of **MA-17** standard handles (figure below) on the external/internal side.

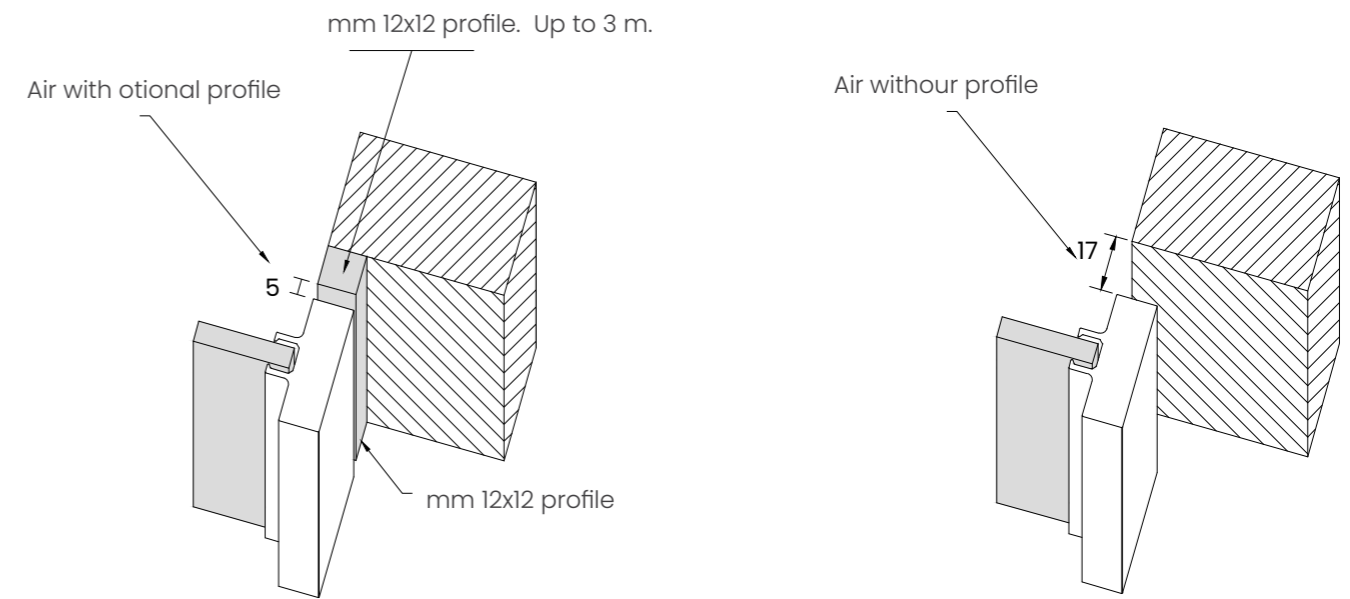

Handle type MA17

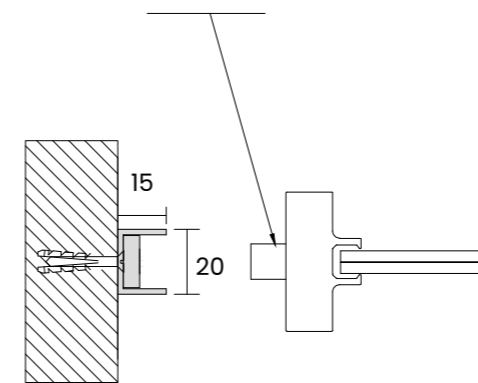

WALL PROFILE FOR AIR REDUCTION

It is possible to install a 12 x 12 mm section profile on the wall to reduce the air between the door and the wall.

SIDE JAMB

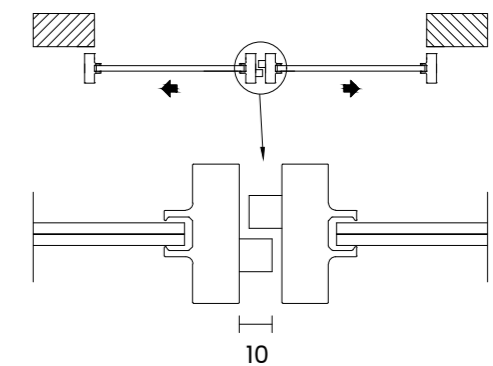

Optional side jamb includes a closing striker of mm 10 x 10 added on the door's profile.

Both the side jamb and the central joint profile are made of extruded aluminum coordinated with the door.

CENTRAL JOINT PROFILE

Central joint profile for two-panels sliding door that includes a mm10x10 profile on the closing side of each panel.

The central joint profile allows you to avoid the light between the door's panels.

Data sheets

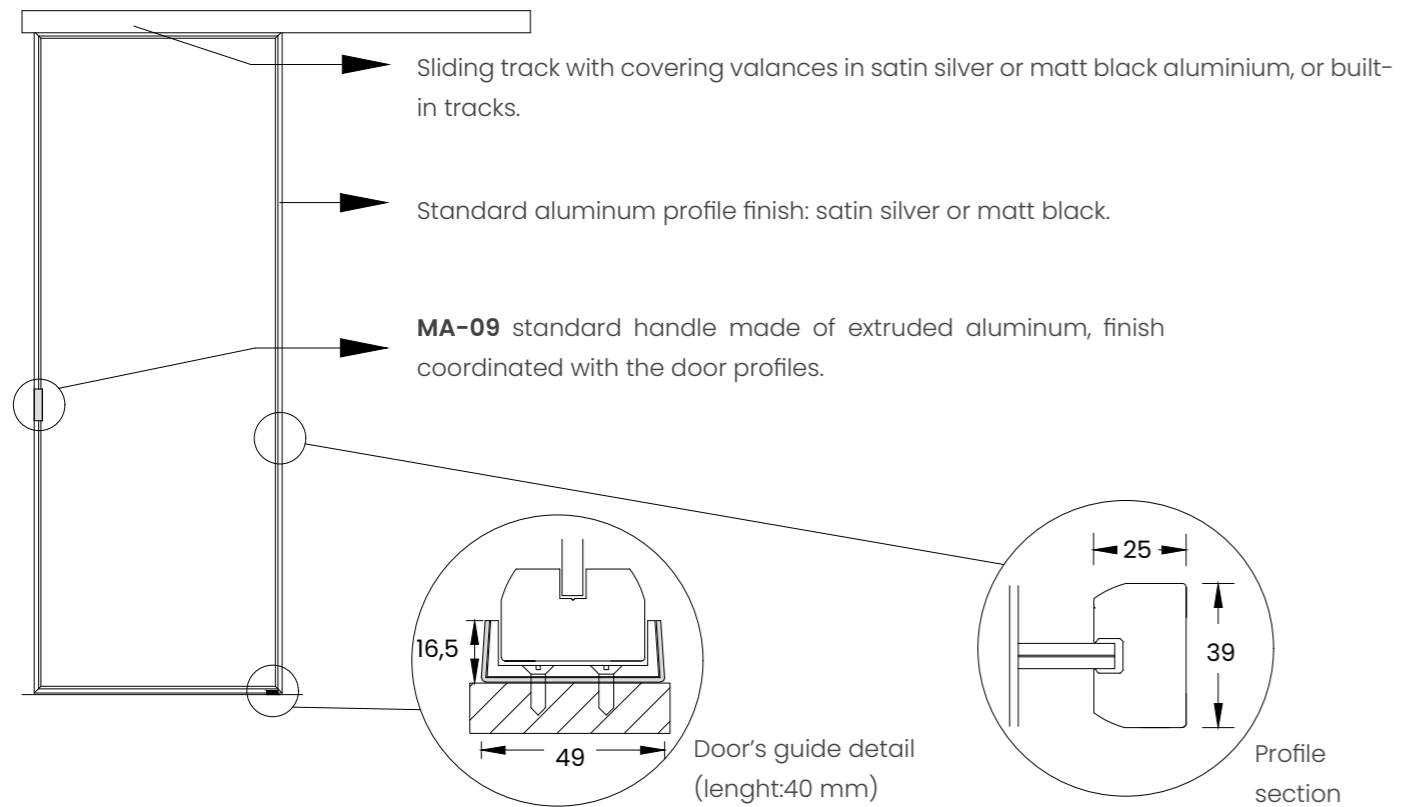

Sliding Extra Light door

SLIDING DOOR

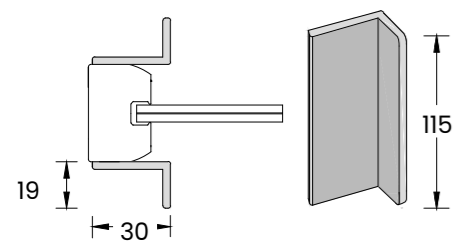

The Extra Light sliding door is always made to measure with maximum dimensions of 130 x 300 h cm (net passage).

The Extra Light sliding door is equipped with a pair of **MA-09** standard handles (figure below) on the external/internal side.

Rollers with soft stop on closing and soft stop on opening: standard.

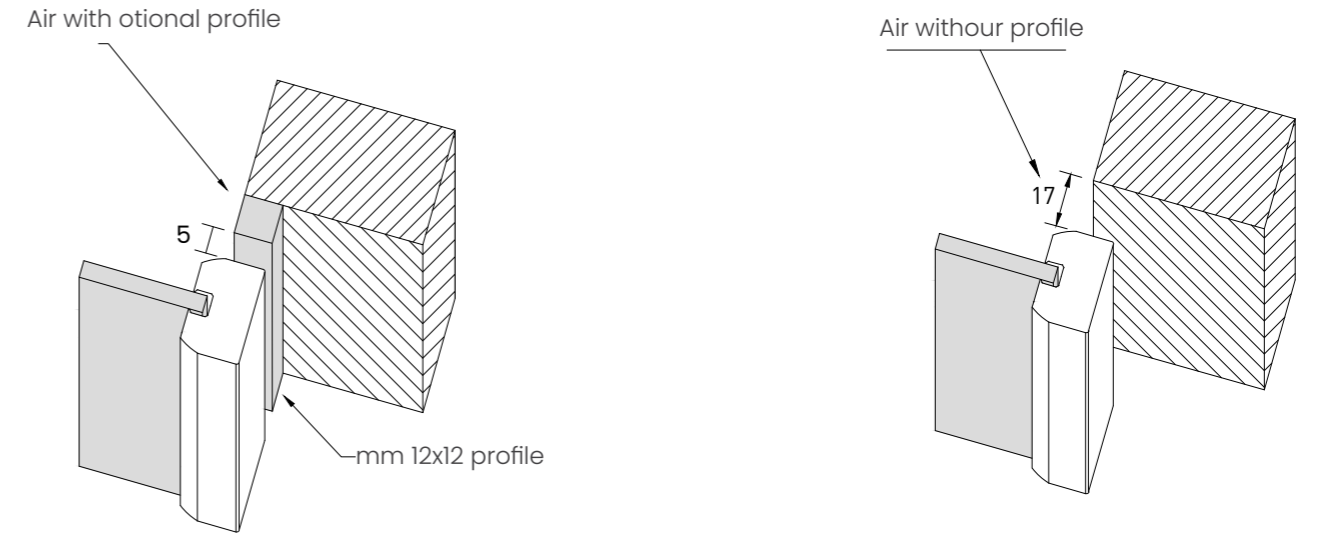

Handle type MA09

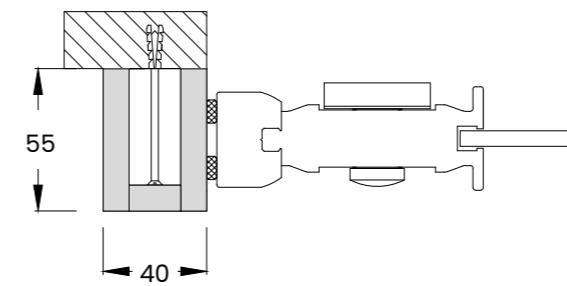

WALL PROFILE FOR AIR REDUCTION

It is possible to install a 12 x 12 mm section profile on the wall to reduce the air between the door and the wall.

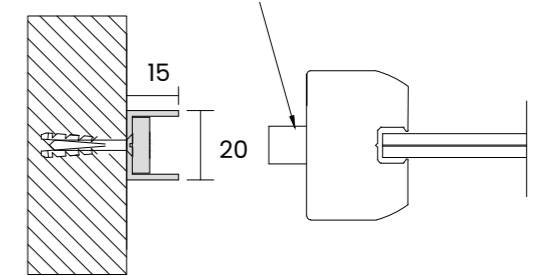

VERTICAL SIDE JAMB

Optional vertical side jamb sized mm 55 x 40, mandatory for matching the hook lock.

Both the side jamb and the central joint profile are made of extruded aluminum coordinated with the door.

Optional side jamb includes a closing striker of mm 10 x 10 added on the door's profile.

This profile allows you to avoid the light between the door's panels.

Data sheets

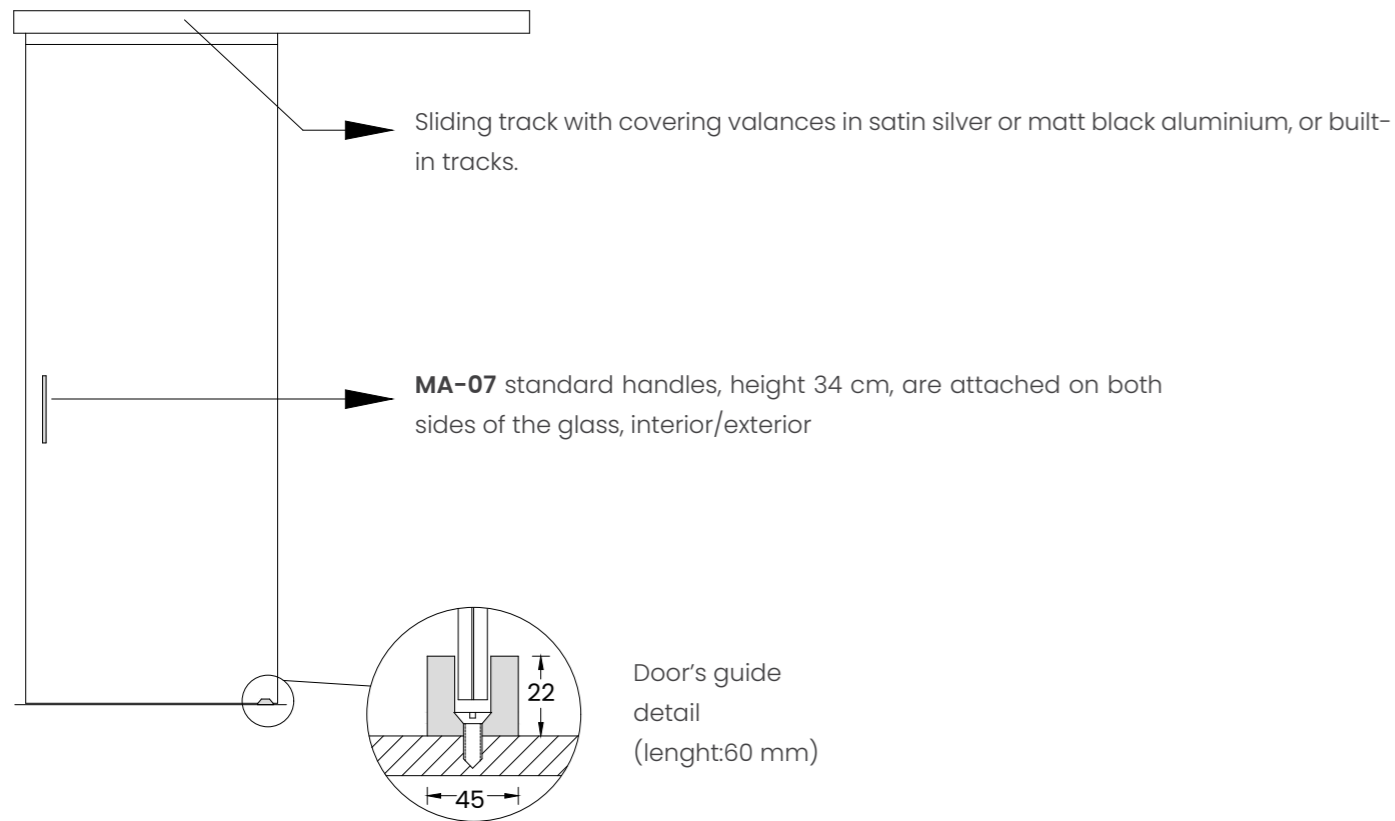

Sliding Glass door

SLIDING DOOR

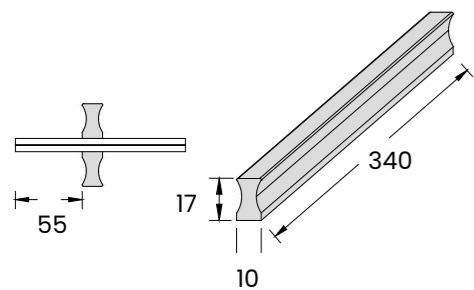

The Glass sliding door is always made to measure with maximum dimensions of 130 x 300 h cm (net passage).

The Glass sliding door is equipped with a pair of **MA-07** standard handles (figure below) on the external/internal side.

Rollers with soft stop on closing and soft stop on opening: standard.

Handle type MA07

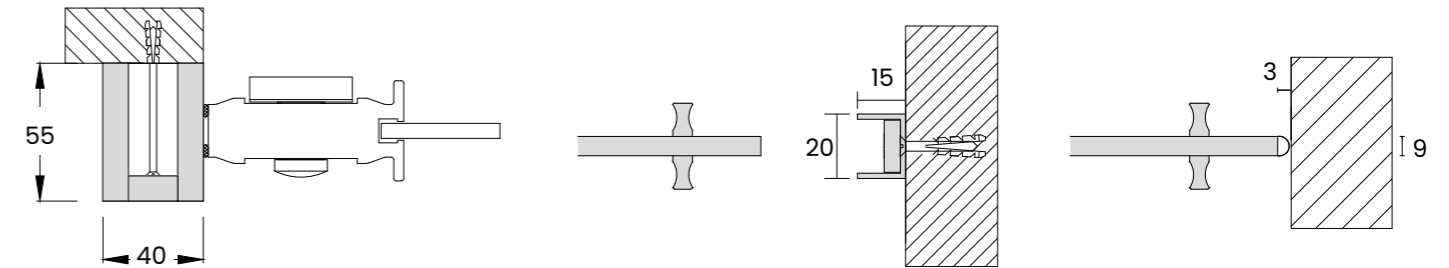

VERTICAL SIDE JAMB

Optional vertical side jamb sized mm 55 x 40, mandatory for matching the hook lock.

Wall side jambs made of satin silver aluminium.

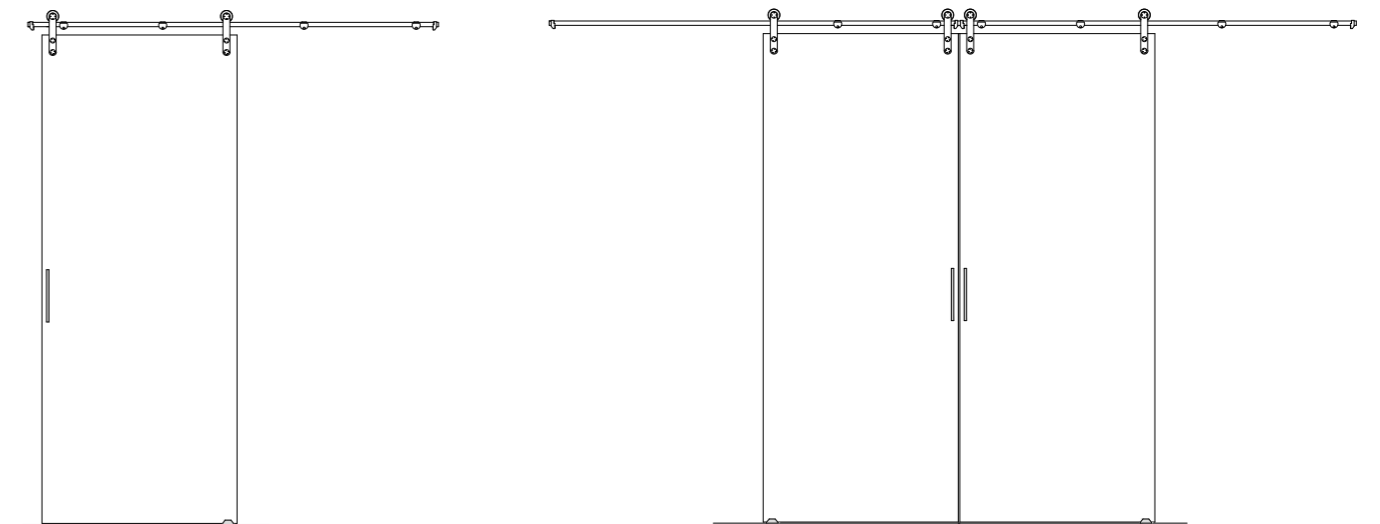

Transparent strike seal to be glued onto the thickness of the glass

SLIDING TRACK WITH VISIBLE MECHANICS

Satin-finish AISI 304 stainless steel sliding system consisting of two carriages and a round-section track with visible studs. Available with a one-way track and wall mounting. This system is only suitable for use with tempered glass.

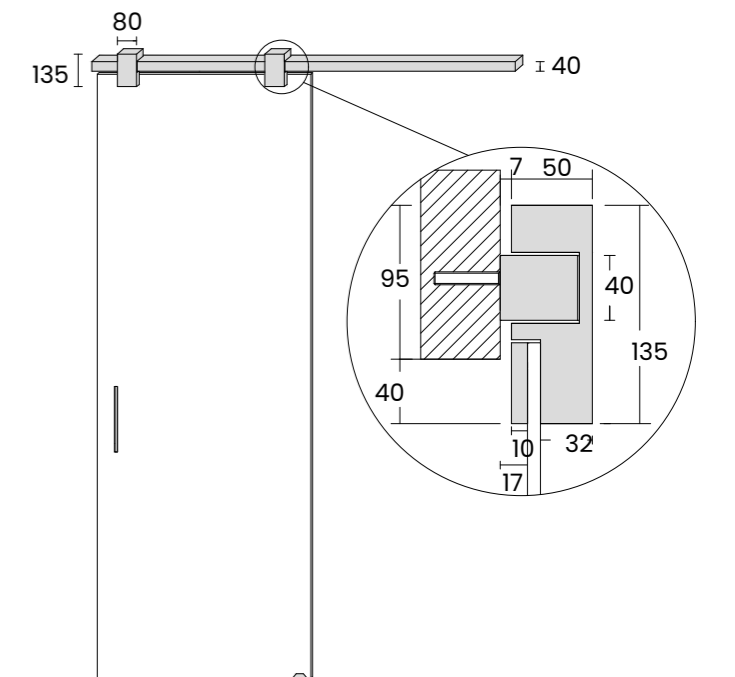

A soft-closing option is not available for this system

SLIDING TRACK WITH VISIBLE ALUMINUM CLAMPS

The sliding system with visible clamps is available with a one-way track and wall mounting, the standard finish is satin silver aluminium, and a closing damper is included in the price.

This system is only suitable for use with tempered glass.

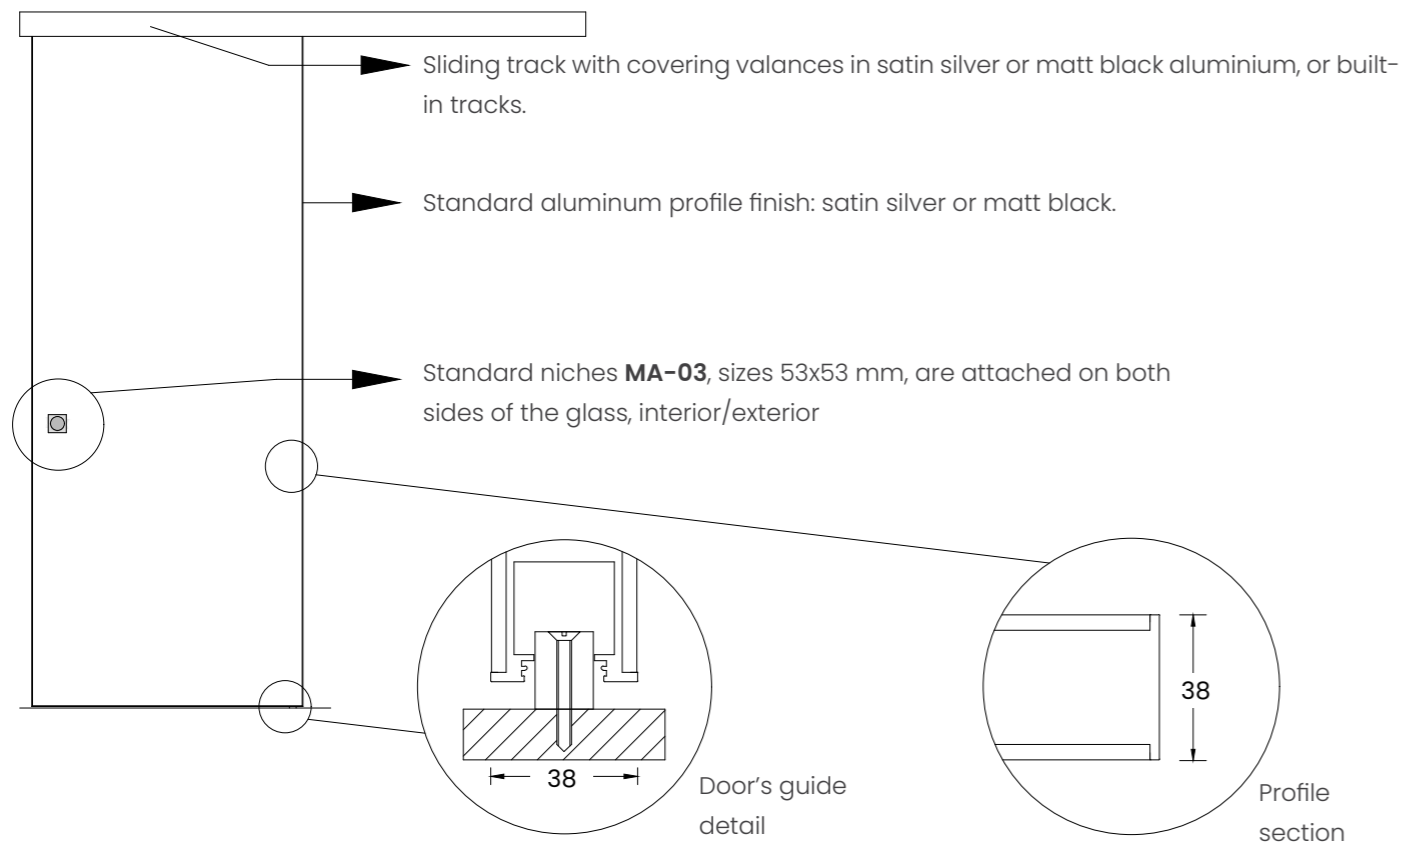

Data sheets

Sliding door Segreta

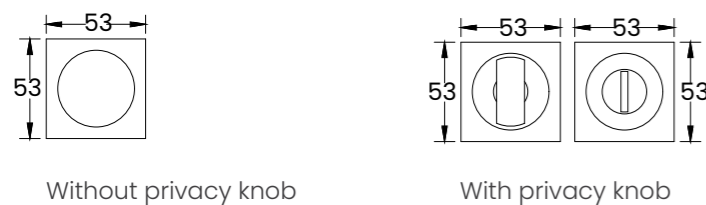

SLIDING DOOR OUTSIDE THE WALL

The Segreta sliding door is always made to measure with maximum dimensions of 90 x 220 h cm (net passage).

Rollers with soft stop on closing and soft stop on opening: standard.

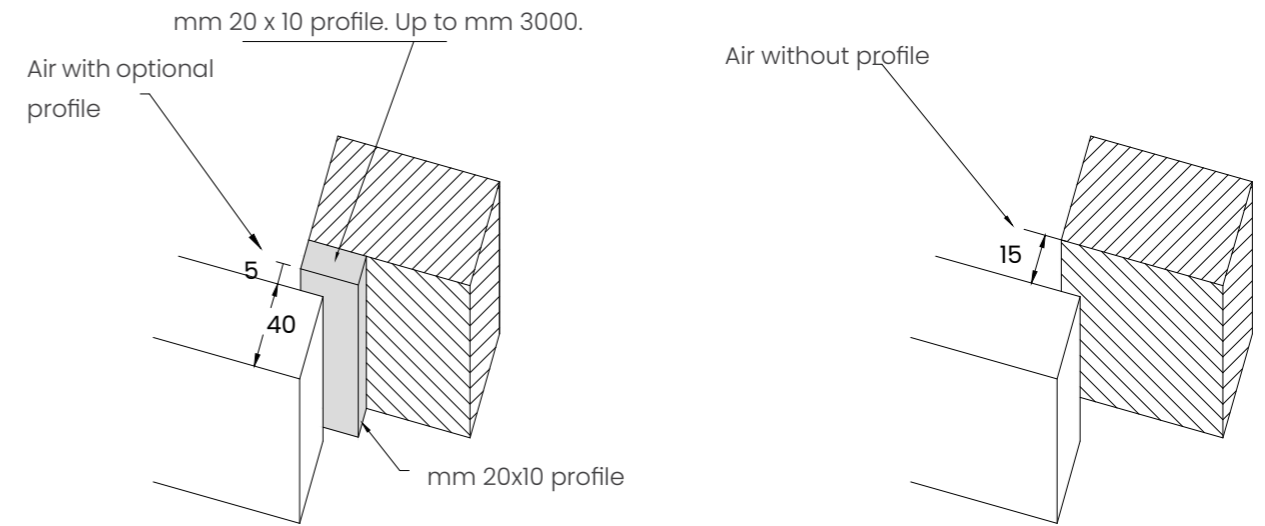

Handle type MA03

WALL PROFILE FOR AIR REDUCTION

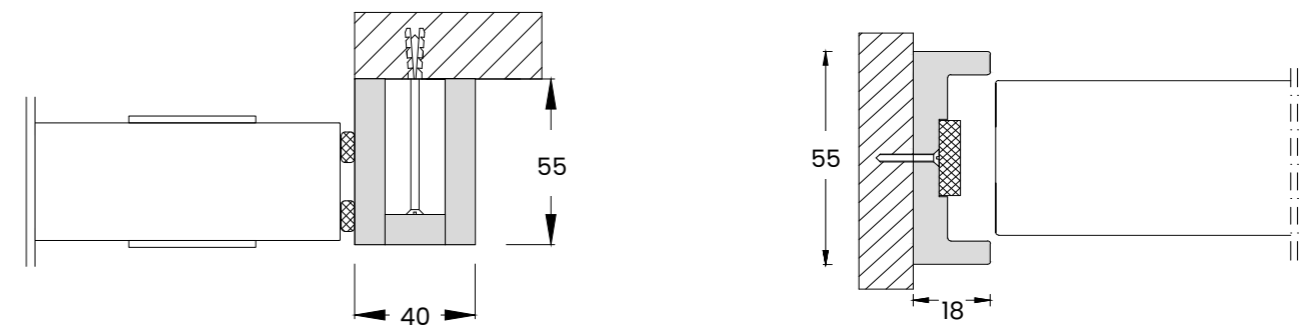

It is possible to install a 20 x 10 mm section profile on the wall to reduce the air between the door and the wall.

VERTICAL SIDE JAMB

Optional vertical side jamb sized mm 55 x 40, mandatory for matching the hook lock.

Optional side jamb includes a closing striker of mm 10 x 10 added on the door's profile.

Both the side jamb and the central joint profile are made of extruded aluminum coordinated with the door.

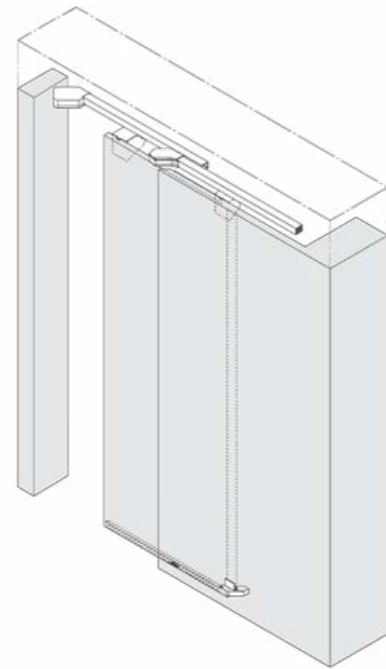

This profile allows you to avoid the light between the door's panels.

Data sheets

Coplanar sliding Segreta-S door

The system remains perfectly flush with the wall on the external side while, on the internal side, the covering valance and the aluminum trolley covers remain visible. Also visible from the internal side is the particular door guide in the lower part; this is to guarantee correct functioning and a certain ease of intervention for any future maintenance of the product.

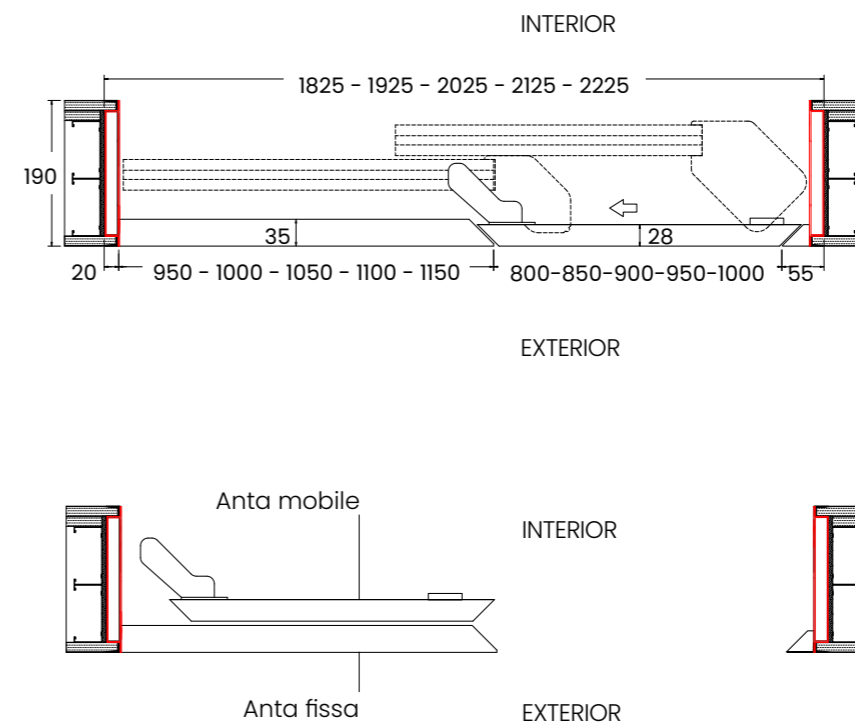

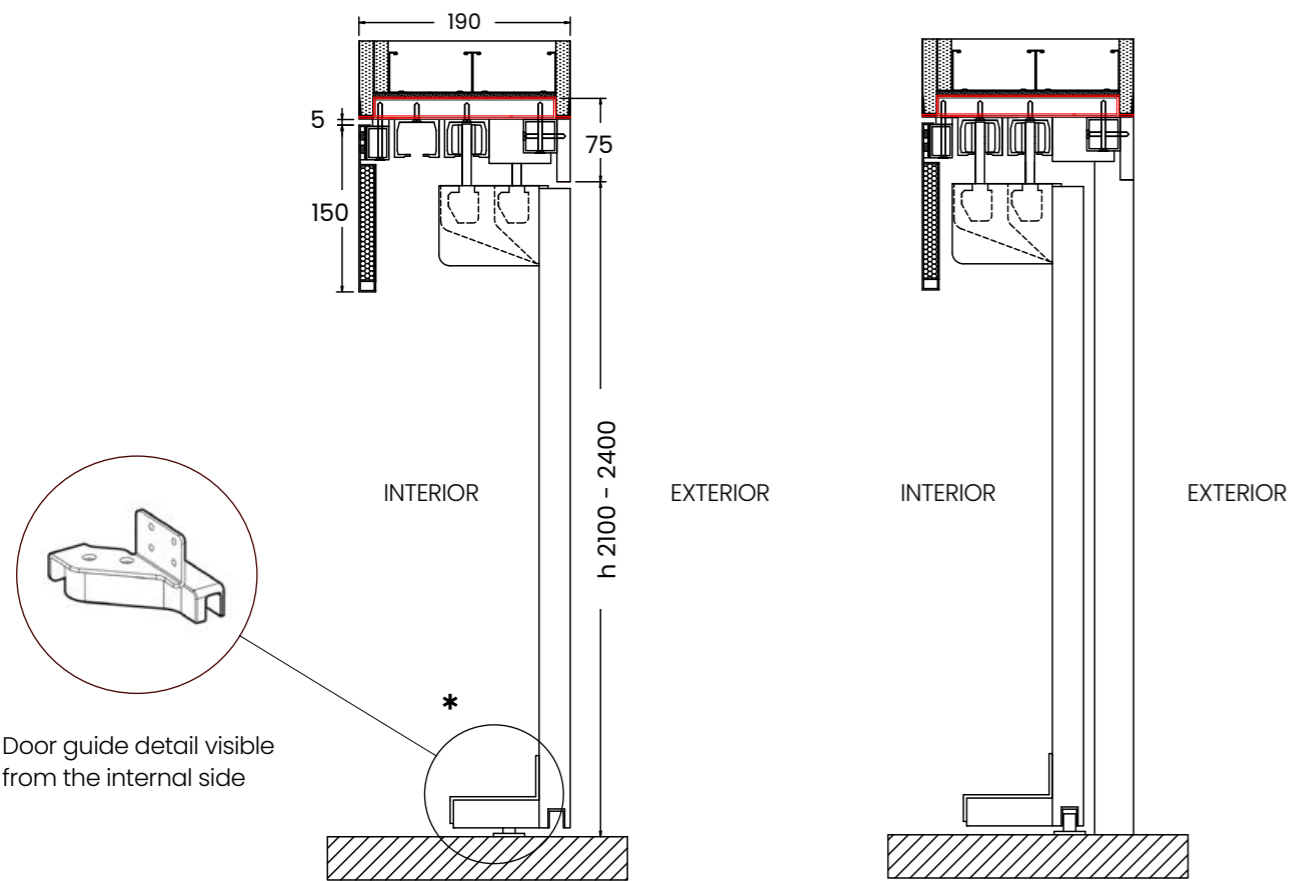

Given the aesthetic characteristics of formal cleanliness of the external side and the technical characteristics visible from the internal side, we recommend using the Segreta-S coplanar sliding door to close those compartments where aesthetic formality is necessary on only one side such as, for example, the closing a pantry or wardrobe compartment.

SKIRTING BOARD DETAIL

door opening's operating video **Segreta-S**

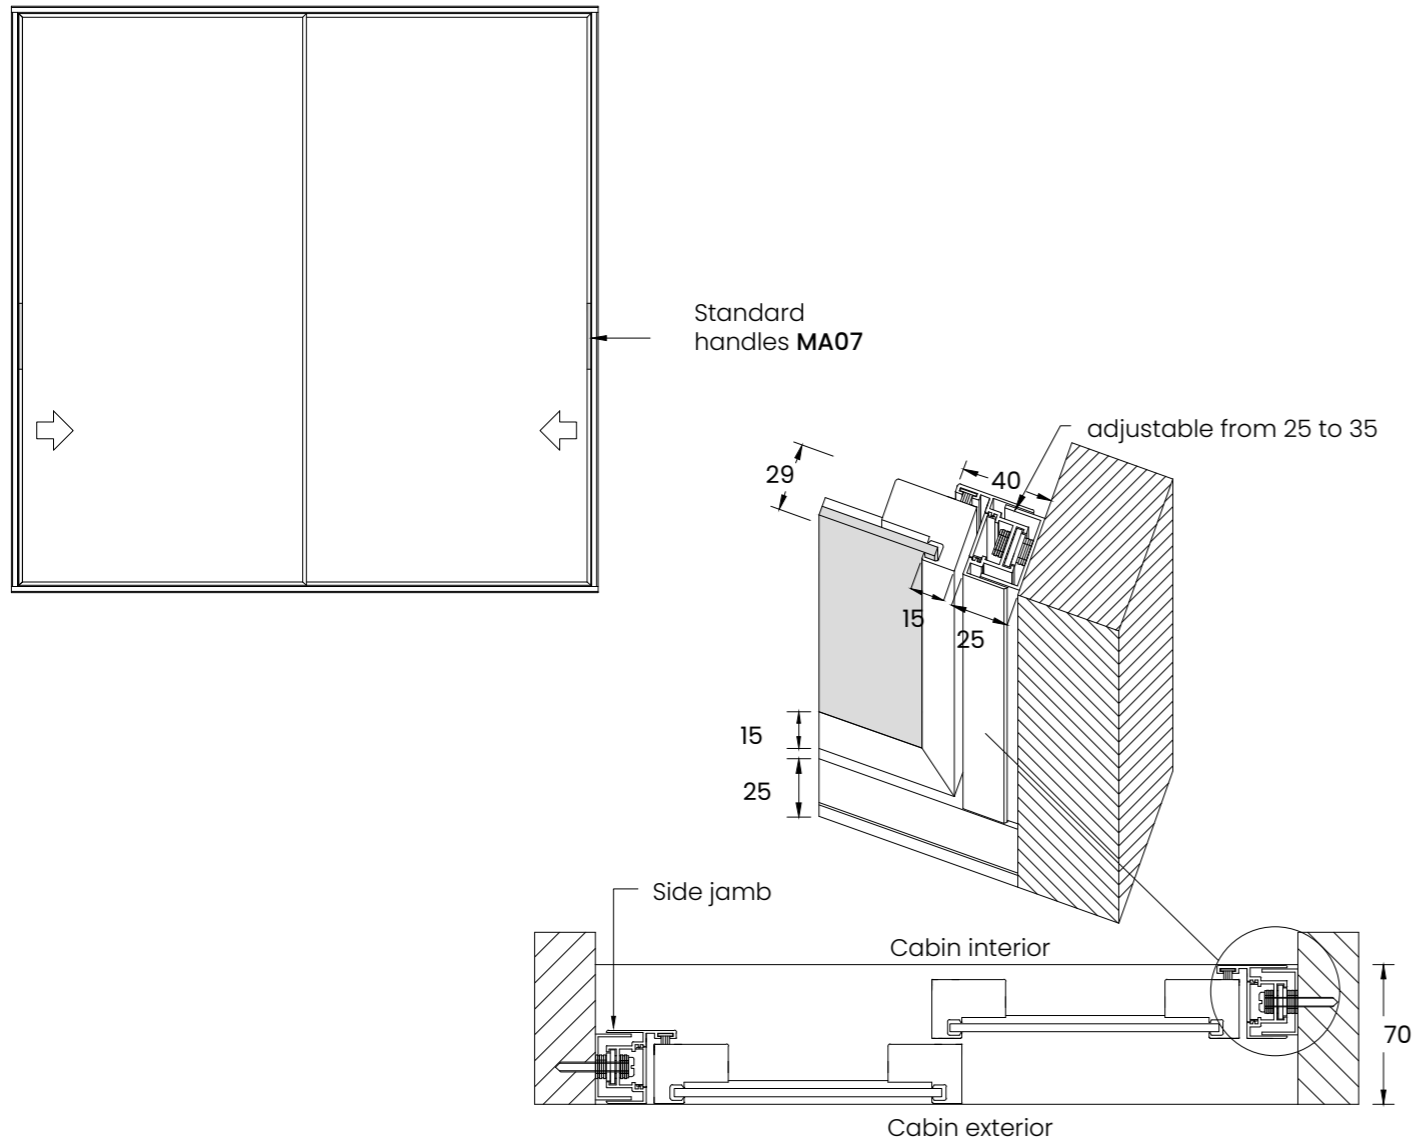

Sliding closure composed of a fixed panel and an opening panel made of reinforced honeycomb covered in MDF.

Perimeter frame in extruded aluminum to be finished flush with the wall, two-way sliding system, adjustable trolleys, movable internal valance and particular adjustable door guide visible from the internal side.
